

CROSS SECTIONS
1:200

ARMOUR LAYER	
ARMOUR	3 ton DOLOS
SLOPE	1:2
PACKING DENSITY (DOS/100m²)	6.93
LAYER THICKNESS	2.050 mm
CREST LEVEL	3.456m MSL
TOE LEVEL	-4.200m MSL
CREST WIDTH	3.200 mm
TOE WIDTH	3.300 mm
UNDERLAYER	
GRADING	100 - 500 kg
LAYER THICKNESS	1.000 mm
FILTER LAYER	
GRADING	10 - 50 kg
LAYER THICKNESS	465 mm

LEGEND

- FILTER LAYER TO FILL VOIDS
- UNDERLAYER (M_{50} = 300 kg)
- ARMOUR ROCK (M_{50} = 3 000kg)
- EXISTING 3 ton DOLOS
- NEW 3 ton DOLOS
- GEOTEXTILE (GRADE A200 BDM)
- EXISTING GROUND PROFILE
- NEW PROFILE

General Notes

The contractor shall verify all site conditions, dimensions and levels on the site and notify the NEC supervisor of any variations before construction.

Dimensions are in millimetres except on chainages and cross-sections, which are given metres.

Dimensions must not be scaled or assumed. After notification, discrepancies or missing dimensions will be corrected in writing by the engineer.

All levels are with reference to Mean Sea Level (MSL) which is 0.626 above Chart Datum (CD).

Total no. of cubes available at stacking yard is TBA. Concrete strength and dimensions of cubes to be verified during construction.

Armour rock to conform to EN 13383.

Concrete (where applicable the following shall apply)

All concrete work shall conform with the latest amended issue of SANS 2001 : Standard Specification for concrete works and SANS 10100 : The structural use of concrete.

New dolos to be cast with concrete with a 40MPa 28-day strength

A set of six cubes must be made for every fifty cubic meter (or portion thereof) of concrete poured on a specific day. 3 of the cubes must be tested at seven days, and the balance must be weighed for testing at 28 days.
The test results are to be submitted to the engineers immediately and should any problems be anticipated no shuttering is to be stripped until further notice from the engineer.

All concrete shall be vibrated according to specification. All concrete must be cured continuously for seven days after pouring and effectively protected against dehydration.

Coordinate System Details	
Ellipsoid	WGS-84
Datum	Hartebeesthoek 94
Projection	Gauss Conform Lo25°
