SECTION 3: BACKGROUND, OVERVIEW AND SCOPE OF REQUIREMENTS

1 BACKGROUND

The Central Corridor is a strategic and important go-through passage for different corridors. Transnet's primary business is to provide rail transport of commodities for the export, regional and domestic markets. Transnet operates the world-class heavy-haul coal and iron ore export lines and is developing the manganese export corridor to heavy-haul standards.

Transnet also transports a broad range of bulk general freight commodities and containerised freight. The division maintains a complex rail network of approximately 31 000 track kilometres (20 900 route kilometres) over which commodities are railed.

The diverse rail network comprises 1 500 kilometres of heavy haul lines and includes 3 928 kilometres of branch lines that serve as feeders to main lines. The rail network service provides strategic links between ports, terminals and production hubs, providing connectivity within Southern African railways to support regional integration. Infrastructure connectivity, coupled with close co-operation with other Operating Divisions and collaboration with key customers, enables the delivery of freight volumes across value chains.

Transnet introduced a new operating model that shall decentralise key responsibilities to ensure a more responsive rail freight network that is better equipped to service the South African economy.

The Central Corridor specifically is divided into sectors below:

- Cluster 1 (Sentrarend and lines, Leeuhof, Sasolburg, Potchefstroom, Klerksdorp and Lines)
- Cluster 2 (Elandsfontein, Marieshoop, Springdale, Kaalfontein, Pretcon, Capital Park, Watloo & Greenview and lines, Natal Spruit yard and lines.)
- Cluster 3 (Klerksdorp and lines, Mafikeng and lines.)

The Central Corridor has critical infrastructure below.

- Length of the rail network – 2818 Kilometres (km)
- Total traction Sub = 58 (24 sites have existing technology)
- Total distribution Sub = 41 (1 site has existing technology))

- Total relay room = 107 (25 sites have existing technology)
- Depots= 3
- Yards= 35 (11 sites have existing technology)

The Central Corridor is illustrated on the map below:
