**The “Specifications” included as Appendix A describe all and each of the functions to be performed under the contract in details.**

## 2.1.3 General Requirements

2.1.3.1 The Service Provider must plan its operations to allow it to outsource 30% or more of its work, manage their subcontractors, perform property administration as required, submit reports and enter data into the Employer’s computer system such as document management system, ITIS, PIMS, and any other relevant systems, and meet the deadlines stipulated in the Specifications. It is important to consider that the Employer has the stated computer systems which must be utilised for recording of transactions, as required by the Employer. The Employer will also require Full Integration of Systems with the Service Provider now and in the future as the environment changes.

2.1.3.2 Data must be entered into ITIS, which is the acronym for the “Integrated Transport Information System”. ITIS includes interfaces that the Service Provider must use to enter data, generate reports, measure progress and coordinate the various aspects of the Service Provider’s work. Each user of the interface will be required to register on the system. Guidance in the use of the system is provided in the ITIS guidelines.

2.1.3.3 Whilst ITIS is a system that maintains certain checks and balances and is approved of and regarded by the Auditor-General as the definitive record of the Employer’s land portfolio, the Service Provider shall maintain adequate skills, training levels, quality management procedures and information technology resources to ensure that by the time data is entered into ITIS, it is of such a quality that it will withstand any enquiry into its reliability as a source of accurate information. The Employer retains the right, at any time, to require of the Service Provider to produce its quality management procedures to provide evidence of its diligence with regard to quality management. In order to be able to deal with audit queries, the Service Provider shall provide the Employer with copies of its quality management system and shall accept that these documents may be used verbatim, or in an adapted form to further enhance the specifications of future contracts.

2.1.3.4A Work Programme required to be developed by the Service Provider at the start of the contract must be updated regularly for discussion in the monthly progress meetings between the Service Provider and the Employer.

2.1.3.5 The Service Provider shall be required to adhere to the requirements of Occupational Health and Safety legislation and be especially prudent to maintain safety procedures whenever staff travels and works. An OHS Officer who is a specialist in the field must be in the employment of the Service Provider.

2.1.3.6 The Service Provider shall consider that any erroneous work produced will be required to be corrected at its own cost and penalties will be imposed for delayed completion of works.

2.1.3.7 The Service Provider shall consider that accuracy of data is paramount and that work must be carried out within the accuracies and tolerances generally accepted by and adhered to by the members of professional bodies which govern the work disciplines to be involved in the contract.

2.1.3.6.8 Payments will be made monthly to the Service Provider upon the presentation of detailed monthly certificates, and where indicated in the specifications, must be supported by copies of invoices of actual expenses incurred. Remuneration will be based on the principle of payment being made for all work done to-date, less all previous payments. This method is entirely "self-healing" in the sense that any inaccuracies of measurement are automatically corrected in later claims, without the need for credits and debits to be made, which complicate accounting.

2.1.3.6.9 The Service Provider's attention is drawn to the numerous Acts and Regulations that apply to the various disciplines of work to be carried out. In addition, it must be noted that the Employer is a State-owned enterprise that operates as a Limited Company, and as a result is governed by such legislation as the Treasury Regulations, the Preferential Procurement Act, Public Finance Management Act (PFMA) and others more fully described in the Specifications, or which may be applicable without reference to them in the Specifications.

2.1.3.6.10 The Service Provider shall maintain a Risk Register for the purposes of mitigating any risks identified to potentially affect the business of the Service Provider and that of the Employer.

2.1.3.6.11 The Service Provider shall be required to produce Regular Reports and Summaries of Work Planned, Work in Progress and Work Completed. Although most of these reports will be able to be generated by the ITIS system, the Service Provider will be required to produce other reports, such as Financial Reports and Reports of Actions taken during the carrying out of its duties from its own records and make data transfers to the Employer.

2.1.3.6.12 All data collected by the Service Provider belongs to the Employer and shall not be disclosed to third parties without the knowledge and permission of the Employer and may not be used to place the Service Provider in any position of advantage during or after the termination of the contract. Any transgression of this requirement may be adequate reason for the Employer to terminate the contract.

2.1.3.6.13 The Service Provider shall be required to maintain high ethical and professional standards in the carrying out of its duties, actively combat any form of fraud or corruption and shall avoid placing the Employer in any embarrassing or untenable position. The Service Provider shall pursue the objectives of creating fair competition in the property sector, always

strive to obtain fair value for money and efficiency and observe the highest levels of corporate governance.

2.1.3.6.14 Other than is provided for in the Establishment and Time Related Costs section of the Specifications for a Property Administration Service, no specific mention is made of day-to-day administration, staffing, offices, office equipment, profit, etcetera, and neither are these items measured and paid for separately, as these costs are deemed to be covered by the rates tendered.

2.1.3.6.15 The Service Provider must note that certain Targets are set in the Specifications for work that must be carried out by subcontractors of the Service Provider. The purpose of these targets is twofold, *firstly* to provide the Service Provider with a known quantity of work that will keep its employees fully occupied and which will enable peaks in workload to be performed by others and, *secondly*, to provide for transformation and the engaging of black enterprises and individuals that would otherwise have insufficient resources to tender for and perform the whole of the works.

2.1.3.6.16 The contract provides for two transition periods; (a) one to pick up the services from the previous Service Provider, and (b) another to terminate and hand-over the services to the next Service Provider. It must be noted that at the beginning of this contract, the Service Provider shall be obliged to hire the previous Service Provider in the form of a nominated subcontractor until the handover has been completed, which is expected to last 3 (three) months, but may extend to 4 (four) months because of the industry shutdown period, including festive season.

2.1.3.6.17 A period will follow during which the Service Provider conducts its business under Probation, as described in the Specifications and Agreement. Once the Service Provider has successfully completed its probationary period, it will be required to fully provide the services described and specified until 3 (three) months before the termination of the contract.

Within the last 3 (three) months of the contract, the Service Provider will be required to wind down its operations in accordance with a Pre-Programmed Plan and hand over the services rendered to a new Service Provider that will be appointed after a further tendering process.

2.1.3.6.18 The documents and files belonging to the Employer are required to be managed by the Service Provider. A list of available file numbers is provided and must be adhered to, while the requirements of the National Archives and Records Service must be followed.

2.1.3.6.19 Provision is made for the reimbursement of travel and subsistence expenses incurred in the course of carrying out the duties of the Service Provider.

2.1.3.6.20 Annual and monthly budgeting and financial record keeping and control requirements must be adhered to at all times.

2.1.3.6.21 Penalties will be imposed on the Service Provider for a variety of failures to conduct its business to the satisfaction of the Employer.

2.1.3.6.22 The Employer shall insource some or all scope of works, from time-to-time, as the Employer builds internal capacity to perform the property administration services; and the Service Provider must comply with all requirements to ensure efficient transition to fulfil the insourcing objectives.

## 2.1.4 TIME FOR COMPLETION

The Time for Completion of the Works shall be 5 years from the Commencement Date.

## 2.1.5 OCCUPATIONAL HEALTH AND SAFETY

The Service Provider must engage the services of a suitably qualified person to analyse its operations and prepare the required documentation required in terms of the Occupations Health and Safety Act (Act 85 of 1993) and regulations, and thereafter to consistently monitor the safety of the Service Provider and deal with any accident or incident covered by the Act.

## 2.1.6 CHANGES TO SCOPE OF WORK

It is a condition of this contract that the employer reserves the right to limit the total expenditure on the Works due to possible budget constraints. Should the tender sum exceed the budgeted amount, the scope of the works may be reduced at any time before or during the contract period to ensure that the final contract amount does not exceed the budgeted amount. Furthermore, the Employer may during this period or any other period during the contract term elect to insource some or all scope of works without any penalties to the Employer provided sufficient notice has been given to the Service Provider, which notice shall not be less than 3 (three) months.

## 2.1.7 INTEGRATED TRANSPORTATION INFORMATION SYSTEM

The Employer has developed a comprehensive information management tool called ITIS (Integrated Transportation Information System) to address all facets of its strategic and tactical planning, design, construction and maintenance of the entire road network. This provides support for the management tasks of the Employer and allows its personnel to make technical decisions more quickly and efficiently.

ITIS is an integrated approach to the sharing and inter-relating of technical performance information for the Employer and relies on people following procedures to populate the system with data. ITIS currently consists of the following platforms:

- i) ITIS Web – Web enabled portal providing online access to various functions, workflows and reports.
- ii) ITIS Desktop – Offline data capture tool enabling the capture of information offline, validation and then synchronisation of data with the ITIS database.
- iii) ITIS Mobile – Application (Android 6 or later) that allows the in-field capture of information using a smart phone or tablet (must have camera and GPS), validation and then synchronisation of data with the ITIS database. This system is under development and is not yet ready for use.

Currently, the Employer utilises the SAP system. The Service Provider will be required to familiarise itself with SAP features to improve efficiencies and ensure effective management of the contract. Should the system changes, the Service Provider shall utilise the same system and features to ensure efficient integration of systems.

## 2.1.8 REQUIREMENTS IN RESPECT OF THE USE OF ITIS

The repository of all property related data is the Employer's computer database, accessed through the ITIS interface. If needed, the Service Provider shall be furnished, at no cost, with

adequate licensed software to enable it to enter data into the Employer's database, view it graphically through the GIS system (at present, GeoMedia) and to record documentation into the Employer's document management system (EDMS).

Data is displayed by means of a GIS, which is the best way of identifying data that is spatially incorrect and provides scope for a variety of facilities for viewing data graphically, or in tabular form.

The system is capable of producing numerous reports which have been coded into the system. It is possible for the Service Provider to have other reports suited to its particular needs programmed into ITIS. Requests for new reports must be discussed with the Employer, who, in its sole and absolute discretion, may accede to or refuse any request for a new report.

The Service Provider must note that ITIS shall be available at least 90% of time between 08h00 and 17h00, Monday to Friday and that any problems with the system will be dealt with as soon as is possible by the Employer. Although attention to problems cannot be guaranteed after hours, access to the system will still be possible. The Service Provider shall note that downtime shall only be measured from the time at which any problems are reported to the Employer. The Service Provider shall also ensure SANRAL has access to WinDeed for a maximum of 6 employees to be identified as part of the work programme.

Although ITIS is by no means failproof and will not warn the user of erroneous input in respect of all data, it includes a variety of quality management features that will alert the Service Provider of data that does not meet with data tests defined by the Employer. Quality management, accuracy and quality control shall always remain the ultimate responsibility of the Service Provider.

Upon commencement of the contract, the Service Provider shall be required to attend training on the use of ITIS and familiarise itself with the data that is contained on the database behind the ITIS interface.

#### **4.3 STEP THREE: Minimum Threshold Evaluation and Final Weighted Scoring**

- a. Price and Specific Goal: SANRAL will utilise the following formula in its evaluation of Price:

A maximum of 80 or **90 points** is allocated for price on the following basis:

**80/20**

or

**90/10**

$$P_s = 80 \left( 1 - \frac{P_t - P_{\min}}{P_{\min}} \right) \quad \text{or} \quad P_s = 90 \left( 1 - \frac{P_t - P_{\min}}{P_{\min}} \right)$$

Where

$P_s$  = Points scored for comparative price of bid under consideration

$P_t$  = Comparative price of bid under consideration

$P_{\min}$  = Comparative price of lowest acceptable bid

Specific goals	Criteria	10 points		20 points

b. **Specific Goals** [Weighted score 20 point]

- Specific goals preference points claim form
- Preference points will be awarded to a bidder for attaining the specific goals requirements in accordance with the table indicated in the specific goals Claim Form.

#### 4.4 STEP FOUR: Post Tender Negotiations (PTN) (if applicable)

- Respondents are to note that SANRAL may not award a contract if the price offered is not market related. In this regard, SANRAL reserves the right to engage in PTN with the view to achieving a market-related price. Moreover, SANRAL reserves the right to cancel the tender, in its discretion, if the PTN does not yield satisfactory outcome.
- Negotiations will be done in a sequential manner i.e.;

- First, negotiate with the highest ranked bidder, and in SANRAL's discretion may elect to cancel the bid, should such negotiations fail;
- Second, negotiate with the 2<sup>nd</sup> and 3<sup>rd</sup> ranked bidders (if required) in a sequential manner;
- In the event of any Respondent being notified of such short-listed/preferred bidder status, his/her bid, as well as any subsequent negotiated **Best and Final Offers** (BAFO), will automatically be deemed to remain valid during the negotiation period and until the ultimate award of business; and
- Should SANRAL conduct post tender negotiations, Respondents will be requested to provide their **Best and Final Offers** to SANRAL based on such negotiations. Where a market related price has been achieved through negotiation, the contract will be awarded to the successful Respondent(s).

#### 4.5 STEP FIVE: Award of business and conclusion of contract

- Immediately after approval to award the contract has been received, the successful or preferred bidder(s) will be informed of his/their Tender bid by way of a Letter of Award. Thereafter, the final contract will be concluded with the successful Respondent(s).
- Otherwise, a final contract will be concluded and entered into with the successful Bidder at the acceptance of a letter of award by the Respondent.
- Respondents are to note that, on award of business, SANRAL is required to publish the tendered prices of the successful and unsuccessful Respondents *inter alia* on the National Treasury e-Tender Publication Portal, ([www.etenders.gov.za](http://www.etenders.gov.za)), as required per National Treasury Instruction Note 09 of 2022/2023 as well as SANRAL website. **[This is not applicable if RFT was not advertised on National Treasury e-Tender Publication Portal]**
- Respondents declaring a commercial relationship with a DPIIP or FPPO are to note that SANRAL is required to annually publish on its website a list of all business contracts entered into with DPIIP or FPPO. This list will include successful Respondents, if applicable.
