Item	Questions	Answers	Clarity Published Dates
1.	Tenderer asked the following clarification question: “We have noticed that there are two boots with the same description, but the only difference is that it one says STL and the other STRD. What is the difference between the two? Should we quote two different style boots, or should we quote the same boot? Should one style be a higher spec (better boots) than the other? If so, which one.”	The specification will indicate STL or STRD. STL refers wide fit, while STRD refers to standard fit. This is detailed in the long text of the description specification Appendix A Rev 1.	2024/04/22
