 P_t = Price of tender under consideration
 P_{min} = Price of lowest acceptable tender

3.2 FORMULAE FOR DISPOSAL OR LEASING OF STATE ASSETS AND INCOME GENERATING PROCUREMENT

POINTS AWARDED FOR PRICE

- (a) an invitation for tender for income-generating contracts, that either the 80/20 or 90/10 preference point system will apply and that the highest acceptable tender will be used to determine the applicable preference point system; or
 - (b) any other invitation for tender, that either the 80/20 or 90/10 preference point system will apply and that the lowest acceptable tender will be used to determine the applicable preference point system,

1. SCOPE OF WORK

This specification covers the code of practice for the safe operation of machinery, plant and equipment and instructions regarding the examination, testing and logging procedures for machinery, plant, and equipment, in the Gauteng region, and any other work arising out of, or incidental to the above, or required from the Contractor for the proper completion of the WORKS in accordance with the true meaning and intent of the contract documents.

2. LOCATION

3. DESCRIPTION

The detailed machine and equipment inspections and testing as per Asset Code 29

3.1 CODE OF PRACTICE No. 29

3.1.1 DEFINITIONS AND DUTIES

3.1.2 EXAMINER (Ref. Old Code 29 Clause B.2.1)

The examiner shall be an artisan or similarly competent person in terms of the Act to undertake the duties as set out in clause 4.3. Of the administrative instructions of the Code of Practice. He/she will be appointed as such. (General Machinery Regulation 1. (a), (b), (c), and (d)).

3.1.3 DUTIES OF THE EXAMINER (Ref. Old Code 29 Clause B.4)

The examiner must thoroughly examine all machinery, plant and equipment situated within his defined area of examination, for defects, deficiencies or wear that affect, or could affect the safe operation of the machinery, plant, and equipment. He must also ensure that the provisions of regulations promulgated to ensure the safe operation of machinery, plant and equipment are met.

Note: Where steel structures form part of machinery or plant, the examiner must also thoroughly examine the structure of damage, cracks, corrosion, or other defects which could affect the safe operation of the machinery or plant concerned.

The findings of each examination must be entered on the logsheet (or logbook) applicable to the item examined. The date of the examination and the examiners signature must be endorsed on the logsheet.

Note: Where no defects, deficiencies, etc., are apparent the examiner must endorse the log sheet, "in good order". The use of ditto or similar inscription marks on logsheets is not permitted.

The examiner and the Supervisor must ensure that logsheets are kept in a good order and arrange for replacement or repair of any torn or damaged log-sheets. If logsheets are replaced the torn or full logsheets must be filed in the equipment file.

The Examiner must have in his possession a complete list showing clearly each item of machinery, plant and equipment examined by him. This list must be updated after every inspection regarding new, withdrawn or transferred equipment.

Examiners must ensure that machinery, plant, or equipment, which they consider unsafe for use, after examination, is not used. In all instances where unsafe machinery, plant or equipment is found during the examination the examiner must endorse the logsheet 'UNSAFE – NOT TO BE USED' and must advise the operator that the machinery, plant, or equipment must not be used until repairs are affected.

The examiner must directly after this examination inform both the Operations Manager and the Supervisor about his remarks on the logsheet and retain their signatures as acknowledgement. The operation Manager in conjunction with the Supervisor must then ensure that the machinery, plant, or equipment is repaired or disposed of as scrap.

Where equipment is not available for examination the examiner must endorse the relevant log sheet, accordingly, stating the reasons, and advises the Supervisor that he has not examined the said equipment. The Supervisor must then immediately inform the Operations Manager in his capacity as user of the unavailability of the equipment. The responsibility then rests with the Operation Manager in his capacity as user to take the necessary action to ensure the safety of the relevant equipment.
