## 6. INFRASTRUCTURE PLANNING, DELIVERY, PROCUREMENT AND MANAGEMENT

The strategic approach for the Engineering and Technical Services of *infrastructure maintenance, improvements, refurbishment or new infrastructure* is guided by the concept of the Infrastructure Delivery Management System (IDMS), the chosen government wide system for Infrastructure Delivery.

The National Treasury, in consultation with relevant stakeholders, conducted the SIPDM review, which resulted in the **Framework for Infrastructure Delivery and Procurement Management (FIDPM)**. The FIDPM prescribes minimum requirements for effective governance of infrastructure delivery and procurement management.

- Treasury Instructions Notes No. 4 of 2015/16 in terms of Public Finance Management Act (PFMA); and
- Circular 77 for Model Supply Chain Management (SCM) policy for Infrastructure Procurement and delivery management.

The Framework specifies the allocation of clear responsibilities for performing activities and making decisions at control points, stages and procurement gates. The Framework promotes the concept ‘value for money’ by organs of state throughout all the Infrastructure Delivery Management and Infrastructure Procurement Management processes and activities to promote optimal use of resources to achieve the intended outcomes. The expected deliverables shall be executed in accordance with the FIDPM Project Life-cycle stages as follow: Stage 6 which is Handover is not applicable for this bid.
