## Specifications / Terms of Reference for bids

## Template: Specifications / Terms of Reference for bids – Annexure H

### 1 DESCRIPTION

The purpose of these terms of reference (TOR) is to source a service provider that will provide the South African Weather Service (SAWS) with Cybersecurity Managed Services for a period of 3 years.

### 2 INTRODUCTION

The South African Weather Service (SAWS) is a public entity of the Department of Forestry, Fisheries and the Environment (DFFE) and derives its mandate from the South African Weather Service Act (No 8 of 2001 as amended). The public entity is listed as a Schedule 3A Public Entity in terms of the Public Finance Management Act (PFMA).

The SAWS is tasked with providing timely and accurate scientific data in the field of meteorology to the broader South African society: a combination of both public good and commercial services. The organisation plays a vital role in South African public life, not just as a provider of key services, but also in empowering citizens to adapt the effects of the ever-changing weather.

### 3 BACKGROUND

Cybersecurity is consistently identified as one of the top risks in today's organisations as security breaches can have devastating effects. As cyber criminals have become more sophisticated and attacks are more prevalent, the potential for serious financial, operational, and reputational damage of a cyber-attack is a critical risk that must be managed. Furthermore, the COVID-19 pandemic has pushed additional demands on the SAWS' ICT estate, especially in terms of maintaining the technical systems and digital architecture which deliver the essential mechanisms for South Africans. Stakeholders in the SAWS ecosystem are interconnected to a national business processes linked by specialised information technology and communication architecture.

The SAWS requires a comprehensive and powerful security service that provides threat hunting, detection, and response across the SAWS' ICT estate to address the following challenges:

- Identification and mitigation of threats and attacks related to Cybersecurity must be addressed as a priority.
- Breaches are addressed reactively due to lengthy mean-time-to-detect, resulting in a long mean-time-to-repair.
- Security incident analysis and response using network detections proactively
- Detection and Response to cyber threat incidents timely
- Regulatory & Industry compliance such as POPIA, PCI-DSS, NIST, CIS
- Scarcity and lack of skilled resources places the organisation at risk as Cybersecurity threats surge globally.

## Template: Specifications / Terms of Reference for bids – Annexure H

- Limited ability and access to obtain verified and quality information for congruent, accurate and timely reporting in the organisation. Limitations include disparate sources of information and limited agility to adapt to changing requirements for reporting.
- Improve the Cybersecurity posture while keeping pace with rapid changes.

The tender takes a holistic view of a programme of information security to achieve:

- **Protection for SAWS** – the Cybersecurity solution should provide digital protection that will ensure the SAWS is not at risk from potential threats such as Adware and Ransomware.
- **Increased availability** – the SAWS hosts live websites and systems that are continuously under threat and require a cybersecurity service to secure and protect these assets from being compromised.
- **Increased productivity** – Attacks and threats can impact performance and make work practically impossible. Effective Cybersecurity will eliminate this possibility and maximise the SAWS' potential output.
- **Enhance reputation** – the SAWS needs to effectively protect the environment against all kinds of cyber breaches and attacks to safeguard SAWS and client's data.
- **Cyber Risk Assurance** - solution that brings structure, order, and oversight to the management of information risk and Cybersecurity, resulting in the enforcement of a consistent, repeatable, and predictable level of security across the entire enterprise.

The SIEM must support a hybrid environment consisting of on-premises servers, Active Directory, cloud platforms, network equipment, and enterprise applications.

The SAWS' IT landscape includes the ICT data centres, regional sites and all assets at these locations. It covers all electronic products that deal with information processed in a digital form and includes the ICT networks and assets owned by SAWS.

The objectives of this engagement are to:

1. Establish centralised security log collection for all critical systems.
2. Provide advanced threat detection, correlation, and automated response capabilities.
3. Improve visibility across endpoints, identities, cloud workloads, email, and network infrastructure.

## THE NATIONAL INDUSTRIAL PARTICIPATION PROGRAMME

---

**SBD 5**

This document must be signed and submitted together with your bid

## THE NATIONAL INDUSTRIAL PARTICIPATION PROGRAMME

### INTRODUCTION

The National Industrial Participation (NIP) Programme, which is applicable to all government procurement contracts that have an imported content, became effective on the 1 September 1996. The NIP policy and guidelines were fully endorsed by Cabinet on 30 April 1997. In terms of the Cabinet decision, all state and parastatal purchases / lease contracts (for goods, works and services) entered into after this date, are subject to the NIP requirements. NIP is obligatory and therefore must be complied with. The Industrial Participation Secretariat (IPS) of the Department of Trade and Industry (DTI) is charged with the responsibility of administering the programme.

### 1 PILLARS OF THE PROGRAMME

- 1.1 The NIP obligation is benchmarked on the imported content of the contract. Any contract having an imported content equal to or exceeding US\$ 10 million or other currency equivalent to US\$ 10 million will have a NIP obligation. This threshold of US\$ 10 million can be reached as follows:
  - (a) Any single contract with imported content exceeding US\$10 million. or
  - (b) Multiple contracts for the same goods, works or services each with imported content exceeding US\$3 million awarded to one seller over a 2 year period which in total exceeds US\$10 million. or
  - (c) A contract with a renewable option clause, where should the option be exercised the total value of the imported content will exceed US\$10 million. or
  - (d) Multiple suppliers of the same goods, works or services under the same contract, where the value of the imported content of each allocation is equal to or exceeds US\$ 3 million worth of goods, works or services to the same government institution, which in total over a two (2) year period exceeds US\$10 million.
- 1.2 The NIP obligation applicable to suppliers in respect of sub-paragraphs 1.1 (a) to 1.1 (c) above will amount to 30 % of the imported content whilst suppliers in respect of paragraph 1.1 (d) shall incur 30% of the total NIP obligation on a *pro-rata* basis.

---

1.3 To satisfy the NIP obligation, the DTI would negotiate and conclude agreements such as investments, joint ventures, sub-contracting, licensee production, export promotion, sourcing arrangements and research and development (R&D) with partners or suppliers.

1.4 A period of seven years has been identified as the time frame within which to discharge the obligation.

## 2 REQUIREMENTS OF THE DEPARTMENT OF TRADE AND INDUSTRY

2.1 In order to ensure effective implementation of the programme, successful bidders (contractors) are required to, immediately after the award of a contract that is in excess of **R10 million** (ten million Rands), submit details of such a contract to the DTI for reporting purposes.

2.2 The purpose for reporting details of contracts in excess of the amount of R10 million (ten million Rands) is to cater for multiple contracts for the same goods, works or services; renewable contracts and multiple suppliers for the same goods, works or services under the same contract as provided for in paragraphs 1.1.(b) to 1.1. (d) above.

## 3 BID SUBMISSION AND CONTRACT REPORTING REQUIREMENTS OF BIDDERS AND SUCCESSFUL BIDDERS (CONTRACTORS)

3.1 Bidders are required to sign and submit this Standard Bidding Document (SBD 5) together with the bid on the closing date and time.

3.2 In order to accommodate multiple contracts for the same goods, works or services; renewable contracts and multiple suppliers for the same goods, works or services under the same contract as indicated in sub-paragraphs 1.1 (b) to 1.1 (d) above and to enable the DTI in determining the NIP obligation, successful bidders (contractors) are required, immediately after being officially notified about any successful bid with a value in excess of R10 million (ten million Rands), to contact and furnish the DTI with the following information:

- Bid / contract number.
- Description of the goods, works or services.
- Date on which the contract was accepted.
- Name, address and contact details of the government institution.
- Value of the contract.
- Imported content of the contract, if possible.

3.3 The information required in paragraph 3.2 above must be sent to the Department of Trade and Industry, Private Bag X 84, Pretoria, 0001 for the attention of Mr

---

Elias Malapane within five (5) working days after award of the contract. Mr Malapane may be contacted on telephone (012) 394 1401, facsimile (012) 394 2401 or e-mail at [Elias@thedi.gov.za](mailto:Elias@thedi.gov.za) for further details about the programme.

#### **4 PROCESS TO SATISFY THE NIP OBLIGATION**

4.1 Once the successful bidder (contractor) has made contact with and furnished the DTI with the information required, the following steps will be followed:

- a. the contractor and the DTI will determine the NIP obligation;
- b. the contractor and the DTI will sign the NIP obligation agreement;
- c. the contractor will submit a performance guarantee to the DTI;
- d. the contractor will submit a business concept for consideration and approval by the DTI;
- e. upon approval of the business concept by the DTI, the contractor will submit detailed business plans outlining the business concepts;
- f. the contractor will implement the business plans; and
