This principle will be applied until 15 separate contractors have been identified.

Criteria for selecting 15 suppliers:

- If two or more tenderers score an equal number of points, the contract must be awarded to the tenderer that scored the highest points for BBEE.
- If Functionality is part of the evaluation process and two or more tenderers score equal total points and equal preference points for BBEE, the contract must be awarded to the tenderer that scored the highest points for functionality.
- If two or more tenderers score equal points in all respects, the award must be decided by the drawing of lots.

consideration in the current contract. Eskom established contracts with many contractors that have not previously provided a service to Eskom, however as there was no limit to the number of contractors who would be contracted with; the number of contractors far exceeded the available work to be allocated.

In order to mitigate the challenge with Authorizations, the recommended approach which has been included in this strategy is as follows:

- Authorizations Pre-requisites (training) (MV Outcome 3&4 and LV Authorizations) are to be included in the Functional Criteria for Scoring.
- The weight of this criterion will be set at a level that will not result in the bid failing to meet the threshold therefore not closing the market.
- But the weight will allow for the criterion to influence the ranking by allowing those bids with valid Authorizations to score additional points.
- Anticipated Outcome: if all other technical requirements are reasonably met, and this results in a score that meets the threshold, the expectation is that the final panel will include contractors with and without authorizations.

Where contractors do not have Authorizations pre-requisites, they are to be given 3 months to obtain the authorization.
