1. PURPOSE

- 1.1. To appoint a suitable Service Provider (SP) on a 3-year contract from 2025/26 financial year to assist DFFE with the planning of rehabilitation interventions for the Working for Wetlands (WfWets) Programmes for a period of three (3) years.

2. INTRODUCTION AND BACKGROUND

- 2.1. The Expanded Public Works Programme (EPWP) was adopted by the South African government in 2004 in line with the broader strategy of addressing structural poverty in South Africa (DEA, 2014). It is a nationwide government-led initiative aimed at drawing a significant number of unemployed South Africans into productive work in a manner that would enable them to gain skills and increase their capacity to earn an income. The EPWP advances the principle of government expenditure, across all three spheres (National, Provincial and Local) of Government to provide employment opportunities and skills development to the unemployed. The Department of Forestry, Fisheries and the Environment (DFFE) has implemented the Environmental Programmes (EP) which are in line with the EPWP through seeking ways to address environmental challenges as per the DFFE' strategic objectives. The EPWP provides the basis against which the EP's aims to ensure the provision of decent work and sustainable livelihoods, with a specific focus on integrated landscape management that supports resilient communities and the environment. Therefore, the programmes aim to target households in line with the EPWP principals on poverty and unemployment at local municipal level.
- 2.2. The Working for Wetlands programme, within the Department of Forestry Fisheries and the Environment manages wetland rehabilitation programmes throughout South Africa. The programme aims to fulfil the needs of ecological restoration using a social upliftment programme of government (the Expanded Public Works Programme - EPWP).
- 2.3. The programme is focused upon rehabilitation, conservation and wise use of wetlands in a manner that develops skills, creates jobs and supports small businesses. In this manner, a significant part of the unemployed are invited into the work force in a tangible way. In the course of its work, the programme enlists the services of Service Providers, who, with project teams, fulfil planned interventions on selected wetland sites throughout the country. The intensive planning for these activities needs adequate details to be used by these Service Providers and project teams.

2.4. The Working for Wetlands Programme runs from 2025/26, comprising 42 projects in 9 provinces. These projects are planned for in one-year cycles but are part of a three-year budget cycle as per the Medium-Term Expenditure Framework (MTEF) of Government. A service provider is sought to engage in planning for the programme's rehabilitation projects for three (3) business years.

2.5. The Service Provider shall, during the period allowed for the execution of the project, ensure that it is in line with but not limited to the following legislation as amended from time to time:

- The Constitution of South Africa, 1996;
- The National Environmental Management Act, 1998 (Act 107 of 1998);

5. EXPECTED DELIVERABLES / OUTCOMES

5.1. Project 1: Strategic Plan development

There are 9 deliverables under this project as follows:

5.1.1. Develop a list of prioritised focus areas within each province namely: Gauteng, Limpopo, Mpumalanga, KwaZulu-Natal, Free State, Eastern Cape, Western Cape, Northern Cape and North-West and their associated Districts where wetlands are prioritised specifically within each province based on decision criteria as per DFFE Policies, Standard Operating Procedures (SOPs) and the existing 5-Year Strategic Plans. The following but not limited to prioritisation themes will apply:

- Importance of wetlands for maintenance of biodiversity,
- Importance of wetlands for the provision of ecosystem services inclusive of establishing baselines for monitoring, reporting and verification of soil organic carbon where applicable (peatlands and palmiet),
- Importance of wetlands for people and livelihoods and
- Wetland rehabilitation potential.

All criteria as outlined in the existing 5-year Strategic plans must be maintained, supported by the latest established research with the addition of new policies and guidelines.

5.1.2. Utilising the prescribed format by the DFFE, review and update the existing 5-year strategic plans for Gauteng, Limpopo, Mpumalanga, KwaZulu-Natal, Free State, Eastern Cape, Western Cape, and North-West and develop one draft 5-year strategic plan for the Northern Cape.

5.1.3. Monitoring of implementation against focus areas as per the 5-year strategic plans to determine the footprint of decision criteria areas affected must be included as a Chapter in each of the final 5-year Strategic plans for each project.

5.1.4. Submission of the final 5-year strategic plans for the five-year period one for each province for nine provinces. Two printed hardcopies per strategic plan for each province must be provided as well as pdf format electronically.

The expected deliverables are as follows:

- 5.3.1 Support of projects in terms of queries around rehabilitation plans. This will involve fulfilling the needs around clarity of rehabilitation plans as they are implemented.
- 5.3.2 Setting out site visits. Before commencement of Implementation, sites need to be set out by the Engineer to ensure that the interventions are in the exact position and meets the design objectives as determined on original plans.
- 5.3.3 Site visit during construction. There should be at least one site visit by the engineer to sites where the structure/s being built is in excess of R400 000 (This is to be decided upon in conjunction with the WfWet planning Manager).
- 5.3.4 Sign - off on structures. Upon completion of structures, these need to be signed off with associated professional responsibility for intervention design meeting objectives. All sites to be signed off by an Engineer who would assume the responsibility of the site designs. As far as possible the site setting out and completion sign off on interventions must be combined.
- 5.3.5 Any amendments required to design drawings must be undertaken by the Engineer and a new final drawing issued who would assume the responsibility of the site designs
- 5.3.6 From the wetlands assessments undertaken during the rehabilitation plan development, establish a baseline for ecological and hydrological characteristics of the projects. Monitor and evaluate the site for

effectiveness of the structures and all interventions, against the established baseline. The monitoring and evaluation must be performed by either a wetland ecologist or hydrogeomorphologist. This monitoring needs to connect with the broader catchment-wide monitoring system so as to build evidence for the cumulative impact of interventions, their outputs and total footprint of outcomes over time which is to be accompanied by mapping and calculations as supporting evidence. A monitoring and evaluation report must be developed and submitted for each project listed as per Table 2.

5.3.7 Compilation of Maintenance Inventory is to be compiled to secure investments on work already completed. Each structure in need of repair needs to be recorded visually against original designs and detailed maintenance guidelines relative to problem dimensions. This will need to be continuously monitored and maintained where necessary and should form part of the monitoring and evaluation reports being compiled.

5.3.8 The engineer must provide a total of 3 days per project per annum for general project planning support.

5.3.9 The engineer must provide a total of 1 day per province per annum for structural integrity maintenance requirements of historical sites. The maintenance inventory must be incorporated into the logbook. As far as possible the structural integrity assessments for maintenance and rehabilitation planning must be combined.

5.3.10 A spatial database inclusive of all polygon, point and line shapefiles, compatible with GIS (or the latest as it becomes available) must be provided in an agreed datum and projection, including coverage of:

5.3.10.1 Planned interventions within planning areas for rehabilitation interventions as well as focus areas for 5-year strategic plans,

5.3.10.2 The identified and assessed wetlands on which work is to be done with respective hydrogeomorphic (HGM) units. Wetland boundaries must be in a polygon shapefile and kml file format with a complete attribute table reflecting the information as per the rehabilitation plans

5.3.10.3 The identified and assessed wetland problems
