INTRODUCTION TO THE NRF

The National Research Foundation Act, Act 23 of 1998, establishes the National Research Foundation (“NRF”) as the juristic person that makes this bid invitation and will contract with the awarded bidder. The Public Finance Management Act classifies the organisation as a Schedule 3A Public Entity.

CONTEXT OF THIS PROCUREMENT

The South African Environmental Observation Network (“SAEON”), a business unit within the NRF, is mandated to conduct Long Term Environmental Research to detect and understand the impacts of Global Change in South

Africa. Six SAEON nodes are strategically situated across geographic regions representing the country's major biomes. SAEON coordinates an array of multi-disciplinary observation platforms and research programs that are designed to monitor and understand Earth system dynamics and human induced changes to these over multiple scales. These initiatives are currently being advanced through the development of a coordinated instrument network that must contribute quality, long-term environmental data for research that will ultimately guide evidence-based policy and decision-making. SAEON is committed to scientific excellence.

A key mandate of the SAEON Elwandle Node is to provide decision makers, the greater research community and the general public with long-term reliable data along South Africa's coastline. The SAEON Elwandle Node would like to incorporate several near real-time moorings at key locations along the South African coastline to provide data on essential ocean variables that will be of value to a wide range of stakeholders.
