### 1 DESCRIPTION

The South African Weather Service would like to invite suitable recruitment agencies to apply for inclusion to its panel of recruitment agencies (technical, support and headhunting services). The appointed agencies will assist the organisation in sourcing of suitably qualified candidates for vacant positions in instances where standard recruitment processes have not produced the desired outcomes.

Successful recruitment agencies will be appointed on a panel for the duration of three years and will be required to sign Service Level Agreements (SLA).

### 2 INTRODUCTION

The South African Weather Service (SAWS) is a public entity of the Department of Forestry, Fisheries and the Environment (DFFE) and derives its mandate from the South African Weather Service Act (No 8 of 2001 as amended). The public entity is listed as a Schedule 3A Public Entity in terms of the Public Finance Management Act (PFMA).

SAWS is tasked with providing timely and accurate scientific data in the field of meteorology to the broader South African society: a combination of both public good and commercial services. The organisation plays a vital role in South African public life, not just as a provider of key services, but also in empowering citizens to adapt the effects of the ever-changing weather.

### 3 BACKGROUND

As a science-based entity, which is technologically led and service driven, most of our vacancies fall under the critical and scarce skills within the Science and Technology sector. Therefore, the organisation requires the services of a panel of recruitment agencies that have a good track record in sourcing suitably qualified candidates in the field or other related fields. Furthermore, assistance will be required for vacancies in the support functions as and when a need arises.
