3 REQUIREMENTS

3.1 General

- 3.1.1 All the insulated and insulating tools to 1000V shall be in good working condition, quality and provide safety to the users.
- 3.1.2 The tools when so required shall be packed in sets.
- 3.1.3 The tools shall be packed in rigidly constructed sheet metal boxes, divided in such a manner to retain the individual items in place.
- 3.1.4 They shall bear SABS mark and shall comply to the latest SANS and ISO as per the technical schedules and normative references on the document.
- 3.1.5 Each tool shall be permanently marked with the following:
- Manufacturer's name or trade mark.
 - Year of manufacturing.
 - Indication of the electrical working limit voltage
 - Indication of the sizes.
 - These indications shall be permanently visible on the insulation part or on the metal part.
- 3.1.6 They shall withstand the expected workloads without failing due to deformation or breaking.
- 3.1.7 If hand tools have conductive elements, insulated with covers of the insulating materials, these covers shall be well fastened, so that they do not come out/off during the normal use.
- 3.1.8 The service ability of the hand tools shall be able to withstand temperature ranges with -20 degrees celcius to +70 degrees celcius.
- 3.1.9 The insulating material applied on hand tools, shall adhere securely to the conductive part- from -20 degrees to +70 degrees celcius.

4 TESTS

- 4.1 To demonstrate the compliance of the product, during manufacturing, a type-test report for insulated metal material according to SANS 60900 detailing all the test done is required.
- 4.2 A Rockwell hardness test for metallic material according to SANS 6508-1 shall be required.
- 4.3 Type test as per technical schedule requirements shall be provided.

5 DOCUMENTATION

- 5.1 Complete set of documentation – operating manuals, instructions etc, shall be provided.
- 5.2 Full technical information relating to the hand tools shall be supplied.

6 TRAINING

- 6.1 All training shall be provided regarding the use of these tools. Only trained and competent personnel shall be permitted to work with tools. Manufacturer's instructions and recommendations shall be adhered to when using any tool.

7. CARE AND MAINTENANCE OF TOOLS

- 7.1 Where employees are issued with a Tool Kit, they are responsible for taking all reasonable precautions against loss and keeping them in serviceable conditions.
- 7.2 The employee in receipt of the Tool kit is furnished with a schedule of the tools supplied and he shall provide a satisfactory explanation at the time they are inspected, should there be any missing, or if they are in an unserviceable condition.
- 7.3 In the case of any tool or appliance being lost, such loss must be immediately reported to the Team Leader, with an explanation of how it happened. If a satisfactory explanation cannot be given, the employee will be held liable for the replacement of such a tool or appliance.
- 7.4 Particular care must be taken of test instruments, rubber gauntlets, rubber mats, protective clothing and other safety devices to prevent damage or loss and they shall be examined by the employee immediately before use.
- 7.5 No wooden ladder or stepladder is to be painted but is to be treated periodically with the solution provided for this purpose, and they shall be inspected by the employee immediately before use, irrespective of their type or make.
- 7.6 Tool check shall be carried out as and when deemed necessary by the manager but these shall be no less frequent than twice per year. The tool schedule shall be endorsed accordingly as and when these checks are carried out.
- 7.7 Employees leaving the service must account for and return all tools issued, as per tool schedule and the value of those not returned shall be deducted from monies due.

8. QUALITY ASSURANCE

A quality management certificate shall be set up to assure the proper quality management of the hand tools during design, development, production, installation and servicing phases. Guidance on the requirements for a quality management plan may be found in the ISO 9001:2015. The details shall be subject to agreement between City Power and the Supplier.

9. ENVIRONMENT MANAGEMENT

An environmental management certificate shall be set up to assure the proper environmental management of the hand tools throughout its entire life cycle (i.e. during design, development, production, installation, operation and maintenance, decommissioning and disposal phases). Guidance on the requirements for an environmental management system may be found in ISO 14001:2015 standards. The details shall be subject to agreement between City Power and the Supplier. This is to ensure that the asset created conforms to environmental standards and City Power SHERQ Policy

10. HEALTHY AND SAFETY

A health and safety certificate shall be set up to ensure proper management and compliance of the hand tools during installation operation, maintenance, and decommissioning phases. Guidance on the requirements of a health and safety plan may be found in ISO 45001:2018 standards. This is to ensure that the asset conforms to standard operating procedures and City Power SHERQ Policy. The details shall be subject to agreement between City Power and the Supplier.
