**10.7.2 Injury to persons or loss of or damage to property**

The **contractor** shall be liable for and hereby indemnifies and holds harmless the **employer** against any liability, loss, claim or proceeding arising at any time during the period of the contract whether arising in common law or by statute, consequent upon personal injuries to or the death of any person whomsoever resulting from, arising out of, or caused by a catastrophic ground movement as mentioned above

The **contractor** shall be liable for and hereby indemnifies the **employer** against any and all liability, loss, claim or proceeding consequent upon loss of or damage to any moveable or immovable or personal property or property contiguous to the **site**, whether belonging to or under the control of the **employer** or any other body or person whomsoever arising out of or caused by a catastrophic ground movement, as mentioned above, which occurred during the period of the contract

**10.7.3** It is the responsibility of the **contractor** to ensure that he has adequate insurance to cover his risk and liability as mentioned in 10.7.1 and 10.7.2. Without limiting the **contractor's** obligations in terms of the contract, the **contractor** shall, within twenty-one (21) **calendar days** of the **commencement date** but before commencement of the **works**, submit to the **employer** proof of such insurance policy, if requested to do so

**SUPPLEMENTARY PREAMBLES**

**Concrete test cubes**

Descriptions and tendered rates for concrete strength test cubes, as required under clause 7, "Tests" of SABS 1200 G, shall be deemed to cater for all the cost of providing cube moulds necessary for the purpose, making, storing and sending thereof to an approved laboratory for testing, paying all charges in connection therewith and for submitting test results to Principal Agent

All concrete strength test cubes, each 150 x 150 x 150mm shall be prepared in a set of three

It will be required from the contractor to prepare concrete strength test cube sets for each section (radiology, dental etc) at the following minimum frequencies:

- One set of three cubes for every 20m<sup>3</sup>,  
or part thereof, of concrete cast per day,

or

- One set of three cubes for each batch  
of concrete cast per event as  
directed by the Clerk Of Works.

All concrete strength test cubes shall be done on site regardless of ready mix and shall be labelled and the identity thereof (ie. date, concrete strength type, position where batch was cast relative to the area and section identity) shall be properly recorded for future reference.

	<p><b>Brought Forward</b></p> <p><b>FIRE DAMPER</b> Manually adjustable solenoid fusible link type c/w black steel ducting to match damper size and complete with all other necessary fittings. Complete damper to SANS 193. 600mm x 600mm 500mm x 400mm</p> <p><b>INLINE DAMPER</b> Manually adjustable solenoid fusible link type c/w black steel ducting to match damper size and complete with all other necessary fittings. 650x650mm 450x450mm</p> <p><b>AREA EXTRACTION SYSTEM for Circulation Passage</b> Supply, erection &amp; commissioning of complete fan systems acc to SANS</p> <p><b>EXTRACTION FAN</b> Axial flow fan to SANS, and selected to run at optimum efficiency Premium efficiency IE3 electric motor to IP66 and SANS 1804. Material of construction is galvanized steel. To be mounted in ceiling space. Complete with VSD (Variable speed drive) and pressure transmitter sensor to do PID control fan speed on an adjustable set point pressure between -30 Pa and 50 Pa. The pressure sensor is to be mounted in the room it is serving. The VSD controller to be installed in a dust proof panel close to fan with heat rejection capabilities. System to be designed to operate at 20% motor speed continuously without overheating. Include the supply, install and test of a silencer to achieve NC 25 (35 dB A) noise in room under the operating conditions specified below. The maximum pressure drop over the silencer is 20 Pa under the operating conditions specified below. Fans must be manufactured in a ISO 9001 certified factory. Fan to be installed and tested to SANS 10173. Vibration mountings and flexible connectors between fan and ducting is required. Air flow to BS848: Part 1, 1980 Noise to BS848: Part 2, 1985. Fan data book and test certificates required.</p>	No No  No No	3 3  2 2
