PART B: TERMS OF REFERENCE & SCOPE OF SERVICES

1. INTRODUCTION

- 1.1. Musina Makhado Special Economic Zone (MMSEZ) is a State-Owned Company (SOC) Business Reg No: MMSEZ SOC LTD 2017/09047/30 established in terms of the SEZ Act to develop, manage, and operate the SEZ, it is a wholly owned subsidiary of the Limpopo Economic Development Agency.
- 1.2. Musina-Makhado SEZ has been designated to be the epicenter of industrial development in Limpopo Province. MMSEZ is a flagship initiative of the Limpopo Provincial government to promote industrialisation through a beneficiation economy while providing value-adding commercial business solutions.
- 1.3. MMSEZ aims to achieve rapid industrialisation using the SEZ as an investment promotion and an industrial policy tool that seeks to attract foreign and domestic investors in resource-based industries.
- 1.4. MMSEZ is a green field investment platform that provides unique business opportunities in various industrial and supporting clusters such as minerals beneficiation, robotics, logistics, agro-processing, and general manufacturing.

2. PROJECT BACKGROUND

- 2.1. The phenomenon of township establishment is recognized and given effect by the Spatial Planning and Land Use Management Act (Act No. 16 of 2013) under the overarching concept of land development. The Act in this regard provides that land development "*means the erection of buildings or structures on land, or the change of use of land, including **TOWNSHIP ESTABLISHMENT**, the subdivision or consolidation of land or any deviation from land use or uses permitted in terms of an applicable land use scheme*". The implication of this is that township development activities fall under the ambit of the Act and should comply with the development principles, norms and standard contained in Chapter 2 of the Act.

- 2.2. Chapter 2 of the Act provides that in conducting land development, the principle of spatial sustainability should be strictly adhered to. In this regard, it is the requirement of the Act that spatial planning and land use management must, among others, consider all current and future cost to all parties for the provision of infrastructure and social services in the process of land development. It is further a requirement of the Act for the principle of efficiency to be adopted whereby: (i) land development optimizes the use of existing resources and infrastructure, and (ii) decision making procedures are designed to minimize negative financial, social, economic or environmental impacts.
- 2.3. To ensure that the above principles are complied with, the Act has established Municipal Planning Tribunals (MPT). The purpose of MPTs is to hear and decide on the land use and development applications as the authority of first instance. The Act in this regard is clear that when considering and deciding an application, an MPT must be guided by the development principles set out in Chapter 2 of the Act and among others take into account: (i) public interest, the facts and circumstances relevant to the application, (ii) the respective rights and obligations of all affected, and (iii) **the state and impact of engineering services**, social infrastructure, and open space requirement.
- 2.4. Considering the above, it goes without saying that the development of both the sites making the MMSEZ would fall under the ambit of the Act. This means that these developments need to be done in compliance with the principles set out in the Act. It also means that the developments needed to be submitted to the relevant MPTs for approval as authorities of first instance before the actual physical development can take place.

3. THE SOUTH SITE

- 3.1. The South Site (Mopani) of the MMSEZ which is approximately 8000 hectares, is situated next to the Mopani Station on the west side of the Baobab Toll Gate, on the border of Musina and Makhado municipalities. This site is earmarked for the development of an energy and metallurgical cluster and other associated heavy industries. Among the targeted industrial projects are; Solar Power Plant; Ferrochromium Plant; Ferromanganese Plant; Iron ore Plant; Carbon Steel Plant; Stainless Steel Plant; Lime Plant; Silicon-Manganese Plant; Metal Silicon Plant; and Calcium Carbide Plant.

- 3.2. The Site South falls under the respective jurisdictions of the Musina and Makhado municipalities. The site is made up of Eight (8) erven with the significant part made up of Five (5) erven falling under the jurisdiction of Musina Local Municipality and the remaining Three (3) erven falling under the Makhado Local Municipality. For the purposes of the township establishment, the portion that falls under Makhado is referred to as Extension 1 and the portion under Musina is referred to as Extension 2. The implication of this is that the township establishment of the South Site will have to serve at the MPTs of both municipalities.
- 3.3. MMSEZ is leasing the land from the Mulambwane Communal Property Association (MCPA). Another unique feature of the South Site is that there is a private operator appointed in line with Chapter 6 of the Special Economic Zone Act (Act No. 16 of 2014) (the SEZ Act) which was followed by issuance of an operator permit by the Minister. According to section 31 of the SEZ Act, the appointed operator is responsible for developing, operating, and managing the SEZ on behalf of the SEZ Board.

4. COMPILATIONS OF LAND DEVELOPMENT APPLICATIONS TO THE MPT'S

- 4.1. It is the intention of MMSEZ to enter a formal contract with professional town planners to follow the appropriate legal and other required steps and methodology for the finalisation of the township establishment submitted on the land pockets as outlined below:
 - 4.1.1. The Farm Steenbok 565-Ms, Limpopo Province
 - 4.1.2. The Remainder of Farm Antrobus 580
 - 4.1.3. The Farm Dreyer 526
 - 4.1.4. Farm Battle 585
 - 4.1.5. Farm Van Der Bijl 825
 - 4.1.6. The Farm Somme 611
 - 4.1.7. The Remaining Extent of the Farm Lekkerlag 580

4.1.8. Portion 1 of the Farm Joffre 584

4.2. The farm portions are owned and registered under the MCPA. MMSEZ is leasing the farm for a period of 99 years for the development of an Energy and Metallurgical Cluster (EMMSEZ).

4.3. MMSEZ intends appointing a Professional Service Provider specialising in town and regional planning to finalise the township establishment application for the above-mentioned farms and make land development applications to the Munisa and Makhado MPTs. The PSP will produce all relevant documentation, as per the legal framework and will follow process for the classification with due diligence. The prospective PSP must run a Town establishment business with professional planners registered with the South African Council for Planners (SACPLAN).

5. PROBLEM STATEMENT

5.1. MMSEZ previously appointed a professional service provider to lead and conduct a township establishment application of the South Site and the PSP started working on the application in 2022. As a means of establishing readiness of the application, MMSEZ discovered that the following critical elements of the application were still outstanding:

5.1.1. The Traffic Impact Assessment (TIA) Report was still incomplete because of the Floor Area Ratios (FAR's) which still required verification and finalisation. Without these FAR's, a TIA report could not be finalised for consideration by SANRAL as a requirement of the township establishment processes as the development will affect a national road falling under the jurisdiction of SANRAL.

5.1.2. There were no consolidated engineering services reports by competent professionals for consideration by the relevant authorities. A TIA report by a traffic engineer must be consented to by SANRAL. Similarly, energy supply, potable water services, sanitation services, and stormwater services reports, have to be produced by experts in the field and submitted to relevant authorities for consent. The importance of these reports is that they indicate where services that will supply the development will be coming from. The energy report must accordingly

outline what the demand of the development is and how that demand is to be met. If the demand was to be met by ESKOM, then the report must be submitted to ESKOM to indicate that it will be able to meet the requisite demand. Likewise, the report on water must indicate the water demand and how that demand will be met. If a Water Service Authority (WSA) will be supplying the water, then the respective WSA must confirm that it has enough capacity to supply the development.

If the water is from natural water resources, the catchment management agency responsible for the catchment management area must indicate availability of raw water allocation. The same applies with the stormwater and wastewater management. As already highlighted above, the lack of these engineering services is a material non-compliance with the development principles.

5.1.3. Furthermore, it has been recommended that the application as received by the municipality needs to be withdrawn and resubmitted as the parameters of the scheme and layout will need to be changed and be determined by the appointed PSP. Accordingly, this means that the appointed PSP will need to reconduct the public participation process and resubmit the memorandum with the new parameters to the two municipalities.

5.2. The lead PSP's contract has come to an end with the above gaps still outstanding. It is on these bases that MMSEZ is seeking an appointment of the replacement PSP to conclude the township establishment on its behalf. It is therefore imperative that MMSEZ appoints a PSP to assist closing the gaps and submit to the two MPTs in accordance with the Act and municipal by-laws. The PSP will also be expected to address the South Site post conditional approval process.

6. OVERALL OBJECTIVES OF THE PROJECT

6.1. MMSEZ SOC wishes to appoint a competent town and regional planning PSP to conclude township establishment application with the respective MPTs on its behalf for the 8000 hectares South Site which will deliver on the following:
