SPECIFICATION AND INDICATIVE SCOPE OF WORK

TERMS OF REFERENCE/ SPECIFICATIONS FOR THE DEVELOPMENT OF ESTUARINE MANAGEMENT PLANS FOR THE KABA ESTUARY, KHOSHWANA ESTUARY, BOBOYI ESTUARY AND VUNGU ESTUARY; AS WELL AS THE DEVELOPMENT OF A DUNE REHABILITATION PLAN FOR THE RAMSGATE DUNE WITHIN THE RAY NKONYENI LOCAL MUNICIPALITY

1. Introduction

The Ray Nkonyeni Municipality will be appointing a service provider to develop Estuarine Management Plans for the Kaba Estuary, Koshwana Estuary, Boboyi Estuary, Vungu Estuary as well as the Development of the dune rehabilitation plan for the Ramsgate Dune.

The Integrated Coastal Management Act (Act 24 of 2008) provides that local municipalities have an obligation to establish and implement Estuarine Management Plans. The ecosystem services provided by South African estuaries and the associated value are increasingly being threatened by human activities and large-scale environmental change. The National Biodiversity assessment (NBA) (Van Niekerk & Turpie, 2012) identified five main pressures impacting on these valuable resources, namely:

- Flow modification (e.g., Water abstraction, alien plants, forestation, increased urban run-off),
- Pollution (e.g., Agriculture, wastewater treatment works, industrial, sediment),
- Exploitation of living resources (e.g., Fish, invertebrates, and mangroves),
- Habitat destruction (e.g., Low lying development, bridges, jetties, and other structures in and around estuaries, mining),
- Climate change (e.g., as reflected in modification in rainfall, changes in temperature, increased storminess, and sea level rise).

These pressure stem from the burgeoning demand on coastal (and estuarine) resources to support ever increasing coastal development. While coastal development has the potential to both grow and sustain local coastal, national and regional economies, those same developments threaten to destabilize these sensitive systems. Estuaries have a diversity of management requirements, often unique to individual systems, and are governed by variety of authorities. Therefore, an estuarine management must allow for a dynamic process that facilitates integrated cross sectorial planning and implementation including stakeholders involved in land use planning as well as management of fresh water and marine resources amongst others.

2. Framework For Estuarine Management

According to the National Estuarine Management protocol (March 2015), the minimum requirements for EMPs are as follows:

- A Situational Analysis Report that highlights the key information that would inform and/or influence the management decisions within the estuary;
- A geographical description and a map of the estuary based on the Estuarine Functional Zone (EFZ) clearly identifying the boundaries of the system (deviations for the EFZ should be motivated for);
- The local vision and objectives that give effect to the strategic vision and objectives;
- A list of management objectives and activities that will be required to maintain or improve the conditions of the estuary;
- Details of intended spatial zonation specifying activities that may, or may not, take place in different sections of the estuary, also indicating organs of state to be consulted given the type of zonation proposed, as well as organs of state that will have to enact relevant laws to implement proposed zonation;
- Detailed integrated monitoring plan with a list of performance indicators for gauging the progress with respect to achieving the objectives of the plan;
- Details of the institutional capacity and arrangement required for managing different elements of the plan, considering different departmental mandates.

3. Strategic Vision and Objectives

The National Protocol, as prepared by the National Department of Environmental Affairs, stipulates that, it is important to establish specific strategic objectives that state specific outcomes envisaged towards achieving the vision. For effective integrated management of estuaries, the following objectives are stipulated:

- **To conserve**, manage and enhance sustainable economic and social use without compromising the ecological integrity and functioning of estuarine ecosystems,
- **To maintain and/or restore** the ecological integrity of estuaries by ensuring the ecological interactions between adjacent estuaries, between estuaries and the catchments, and between estuaries and other ecosystems, are maintained,
- **To manage estuaries** cooperatively through all spheres of government and to engage the private sector entities and civil society in estuarine management,
- **To protect** a representative sample of estuaries (such protection could range from partial protection to full protection) to achieve overall estuarine biodiversity targets as determined by the NBA 2011 and the subsequent update,
- **To promote awareness**, education and training that relate to the importance, value, and management of estuaries,
- **To minimise the potential detrimental impacts** of predicted climate change through a precautionary approach to development in and around estuaries and regarding the utilisation of estuarine habitat and resources.

- **To maintain and/or restore** the ecological integrity of the Ramsgate dune by rehabilitation and stabilization; and to ensure structural integrity of the infrastructure and public safety.

The strategic vision and objectives, as stipulated in the Protocol, are recognised, and will be reflected in the local vision and objectives for individual estuaries that will be defined, in consultation with stakeholders during the objectives setting phase.

4. Project Deliverables:

- Develop Municipal Estuarine Management Plans that must fulfil the requirements of section 34 of the ICM Act (24 of 2008); as well as the Ramsgate Dune Rehabilitation Plan
- Ensuring that the Estuarine Management Plans are consistent and aligned with the National Estuarine Management Protocol and the National Coastal Management Programme;
- The Estuarine Management Plans must form an integral part of the Municipal Coastal Management Programme;

Ps = percentage scored for functionality by Bid/proposal under consideration

So = total score of bid/proposal under consideration

Ms = Maximum possible score

Ap = percentage allocated for functionality

CERTIFICATE OF INDEPENDENT BID DETERMINATION

1. This Municipal Bidding Document (MBD) must form part of all bids¹ invited.
2. Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
3. Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
 - (a) take all reasonable steps to prevent such abuse;
 - (b) reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
 - (c) cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
4. This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
5. In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

¹Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
