## **1 PURPOSE**

The Department of Public Works and Infrastructure (DPWI) requires the appointment of an experienced and competent service provider who has the capacity to supply construction materials, personal protective equipment, tools and equipment, provision of civil engineering materials testing laboratory services for construction of Modular Steel bridges under the “Welisizwe” Programme in the Eastern Cape Province over the 36 months term contract, on an as and when required basis.

## **2 BACKGROUND**

The Department of Public Works and Infrastructure (DPWI) and the Department of Defence (DoD) signed a Memorandum of Agreement (MoA) to collaborate in the construction of Modular Steel bridges in order to improve on accessibility of rural communities. The MoA signed is valid for a period of 5 years and is renewable. Subsequently, there are six respective Provincial Departments with the mandate for construction of roads and bridges entered into the MoA with DPWI.

According to the Memoranda of Agreement signed, the DPWI is to ensure that labour-intensive methods are used during construction enabling the employment of participants from the local communities under EPWP and also the procurement of construction materials including the hiring of tools and equipment and provision of materials testing laboratory services.

The SA Army Engineer Formation (SAAEF) is to provide skilled manpower and expertise during construction of the bridges, including bridge footings and embankment designs and construction supervision. Provincial Departments are the Client and provides funding for implementation of the Modular Steel bridges.

In the course of this collaboration, about 95 bridges per year are planned for implementation across the six identified Provinces over the MTEF 2023/24 to

2025/26. The six provinces identified are the Eastern Cape, Kwa-Zulu Natal, Limpopo, Mpumalanga, North West and Free State.

### **3 PROBLEM STATEMENT**

The historical past of South Africa led to the lack of integrated infrastructure planning especially in the rural areas. Social amenities were constructed without proper consideration of bulk services and road connections. This resulted in social amenities e.g. schools, clinics, police stations, hospitals, courts being far off from communities and villages they seek to services.

The situation has been worsened by the global warming which causes severe climate conditions such as cyclones, storms and floods which have become more frequent, their intensity is becoming more and more severe.

Amidst the effects of global climate change, the situation is not expected to improve as more erratic weather patterns are set to emerge. Recent floods and associated fatalities sadly confirmed that the infrastructural shortfalls extend critically into the availability of bridges providing safe road access for rural communities to basic services such as schools, clinics, police station and other social service providers (e.g. SASSA) and lack of access to economic opportunities which consequently leads to increased poverty levels.

### **4 SCOPE OF WORK**
