Subject : 29836-5E – Supply, testing and delivery of 11 kV single busbar fixed pattern switchgear and associated equipment housed in an e-House

Clarification Queries and Responses:

Item 1. We have went through the documents but we have not seen any requirements for CIDB grading. May you please confirm if CIDB grading is not required

Response for Item 1: There are no CIDB requirements for a supply of goods/services tender document. The scope is to supply, test and deliver a single busbar fixed pattern (non-withdrawable), assembled metal-enclosed switchgear for rated voltages of 12 kV and associated equipment housed in an e-House as per Clause 1.0 on page 45.

Item 2. The received contract is GCC2010 and on the Tender documents received, it is mentioned that you need GCC2015.

Please urgently send us the correct contract.

Response for Item 2: The conditions of contract are Government Procurement: General Conditions of Contract (July 2010) as per Section 5 on page 33. Note that this is different from the SAICE Construction General Conditions of Contract.

Item 3. Please see attached deviations (Deviations attached in clarification email)

Response for Item 3: Please note that this stage of the tender process is for the clarification of queries. We do not negotiate any deviations to the tender document. It is expected that a tender that is fully compliant with the Conditions of Contract and Special Conditions of Contract (SCC) is submitted. Deviations that may be deemed unavoidable and necessary shall be noted under Schedule C1 on page 112.
