The "Bank Verification Status" field indicates that the bank account details submitted by the supplier exist at the bank and that the bank account details are valid. However, as this supplier does not have an identifying number (like a South African ID number, or Company Registration number, or NPO number or Trust number) linked to their bank account details at their respective bank, the CSD system cannot electronically verify that the bank account belongs to the specific supplier. The supply chain practitioner is therefore responsible to obtain supporting documentation to verify that this bank account belongs to this supplier.
