EMERGENCY SERVICES DEPARTMENT

BID NAME

Tender for repairs, maintenance and replacement of the Dräger self-contained breathing apparatus parts for the City of Tshwane Emergency Services Department for a period of three (3) years as and when required.

BID NUMBER

ES 06 -2025-26

1. BACKGROUND

There is an annual provision in the departmental budget to procure and maintain firefighting and rescue equipment/material. The replacement of obsolete and irreparable equipment, buying additional equipment and maintaining it till the useful life has been reached is a continuous process. It is to sufficiently equip the service with the required equipment to ensure that efficient and effective uninterrupted service delivery is rendered to communities of CoT. The equipment is utilized at all fire stations throughout the City of Tshwane. The communities of the City of Tshwane will benefit directly and indirectly from this project since the equipment is used to fight fires and to rescue communities that are in danger.

2. PROJECT SCOPE

It is the intent of the City of Tshwane that these specifications cover for the repairs, maintenance and replacement parts of the Dräger Self-Contained Breathing Apparatus equipment for the City of Tshwane Emergency Services Department.

Over the years, the City of Tshwane Emergency Services have been procuring the Self-Contained Breathing Apparatus (SCBA) sets for use by emergency personnel of the City of Tshwane. An SCBA is a set of equipment which sustain the lives of Firefighters when entering burning buildings or any environment which does not sustain breathing the normal air. It provides clean breathing air contained in a cylinder to the wearer. Through

the normal procurement processes, the City accumulated a large number of Dräger sets approximately 350 SCBA sets and equipment to the value of R20M in service.

It is envisaged that the available Dräger equipment utilized in the ESD Department could still have an expected life time use of 20 years if well maintained, repaired and faulty parts replaced. The cost for one complete Dräger SCBA set is approximately R35 000.

The approach for the repairs, maintenance and replacement of parts for the Dräger Self-Contained Breathing Apparatus equipment is thus more cost effective in the long run and will save the City of Tshwane money by not procuring new and different complete SCBA sets. Savings on buying new sets over a period of 20 years will be significant.

The department cannot go out on Tender now to call for the supply and delivery of a full set of an SCBA. The risk is getting a different set of SCBA manufactured by another company which is not compatible with the Dräger set or the Dräger parts. Having a mix of SCBAs in the department will compromise the health and safety of Firefighters and we will have firefighters perishing in burning buildings because of SCBA that may malfunction because parts of different sets may have been mixed and are not compatible. The National Fire Protection Association 1500 (NFPA 1500) - (Standard on Fire Department Occupational Safety, Health and Wellness Program) does not allow the mix of different SCBA sets to be used at the same time in a Fire Service. There is enough Dräger SCBA sets in the service to give the department another 20 years of life or more provided that they are maintained, serviced, repaired and tested by a Dräger permitted service provider. In case a part of an SCBA becomes faulty, it can be replaced if we have this contract as well.

From time to time, this equipment becomes faulty, damaged or requires servicing, maintenance and standard tests. Since the SCBA sets manufactured by different companies are not compatible with one another nor the parts thereof, it becomes very difficult for Emergency Services to commission repairs, maintenance, servicing and replacing individual parts of the SCBA to get the set in a working condition without a contract with Dräger or any of the service providers that have access to Dräger equipment or are permitted by Dräger to repair, maintain, service and replace damaged parts of the SCBA.

All contract parts shall be new and of the highest quality. They shall be protected from damage; any damaged, flawed or defaced materials shall be rejected and replaced at a cost to the suppliers.

The supplier shall further warrant that all parts / goods supplied under tender award shall have no defect, arising from design, materials, or workmanship or from any act or omission of the supplier that may develop under normal use of the supplied goods in the conditions prevailing in the country of destination.

To eliminate divided responsibility and service, the full scope of the Tender for Repairs, Maintenance and Replacement of the Dräger Self-Contained Breathing Apparatus parts for the City of Tshwane Emergency Services Department shall be awarded to one bidder.

The successful tenderer must be prepared to engage in a service level agreement with the CoT to supply the abovementioned products 24 hrs/ 7 days a week/ 365 days in a year.

The successful tenderer must be prepared to engage in an agreement with the CoT where certain level of stock of the parts should always be available at their premises. (Level of stock for the parts holding to be agreed on by both parties).

The supplier must be able to deliver the services/parts as and when required anywhere within the CoT jurisdictional area at any time in a case of an emergency.

The tender is divided into three sections:

- Section 1: Repair and maintain a part
- Section 2: Replace a part
- Section 3: Test and service of parts or equipment

CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Municipal Bidding Document (MBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
 - a. take all reasonable steps to prevent such abuse;
 - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
 - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
- 4 This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
