		recommended approach which has been included in this strategy is as follows: • Authorizations Pre-requisites (training) (MV Outcome 3&4 and LV Authorizations) are to be included in the Functional Criteria for Scoring. • The weight of this criterion will be set at a level that will not result in the bid failing to meet the threshold therefore not closing the market. • But the weight will allow for the criterion to influence the ranking by allowing those bids with valid Authorizations to score additional points. • Anticipated Outcome: if all other technical requirements are reasonably met, and this results in a score that meets the threshold, the expectation is that the final panel will include contractors with and without authorizations. Where contractors do not have Authorizations, they are to be given 3 months to obtain the authorization from contract award date. This strategy also seeks to outline the limited number of 15 (fifteen) contractors in order to avoid excess number of contractors. This will ensure that contractors will be allocated work on a regular basis and avoid a situation in the previous experiences where contractors only received odd task orders due to large number of contractors in the contract. The successful contractors will be ranked in accordance with the criteria as stipulated under the functionality criteria. In the event that less than 10 contractors obtain authorization within the stipulated 3 months, the gap will be filled up with the next qualifying contractors in order to achieve the desired number. They will be afforded the same 3 months to obtain authorization. If the required number after the second opportunity is not reached the contract will continue with the available contractors.

- Eskom will not accept Rate of Exchange adjustment to be included in any CPA formula.
- Local indices may not be used for CPA purposes for any imported component.
- There must be separate CPA formulae for local and foreign CPA. Local and foreign escalation may not be combined into one formula.
