

## **Neck belt description**

The neck belt shall have the following properties:

Belt strap material: Polypropylene Webbing  
Single layer  
UV resistant for outdoor use  
Black or other dark colour

Belt dimensions: Length 1300mm  
Width 38mm

The belt shall have an adjustable function. One end of the belt shall have two stainless or treated steel “D” rings through which the other end can be threaded. A sliding loop of same belt material shall allow the loose end to be secured to the belt.

The centre of the belt shall have another loop onto which an identification device can be hung. This loop shall be of same belt material, stitched to only one side of the belt, to allow the user to hang the device to the other side of the belt with a cable tie.

**Picture of item to be supplied is a requirement.**
