**Subject:** FW: Objection: Berth 203 to 205 Expansion EIA - Amended EIA Report

Dear Vanessa

Please record my firm objection to the proposed expansion project, namely the Expansion of Berth 203 to 205 of the container berth in Durban Harbour.

As an ardent fly fisherman I am keenly aware of the sensitivity of the potentially affected and the impact to numerous species that use the harbour sandbank as a nursery.

A far greater number of endemic species will be adversely affected by dredging and dredging plumes as this will affect areas all over the delicate harbour area due to tidal action.

I hereby urge the harbour authority responsible for this project to reconsider the environmental and social impact of this project and also lodge my strongest objection possible to this project.

Regards,

Evan Rodda
