

E-gel Power snap PLUS electrophoresis system specifications

- Flexible, high resolution DNA screening; suitable for both high- and low-throughput DNA gel imaging and analysis.
- Camera resolution: 13 MP
- Storage capacity 64 GB
- Cloud enabled
- iBright Analysis Software compatible
- Instrument dimensions (L x W x H): 29.1 x 22.0 x 10.1 cm
- Camera dimensions (L x W x H)
- Image editing capabilities
- Compatible with 11- to 96-well E-Gel agarose gels, with adapters
- Printer compatible: Sony UP-X898MD thermal printer
- Amber filter for Real-time visualization
- Internet port
- USB port for exporting images
- Blue LED light for safety and for samples preservation.
- Installation on site and demonstration
- 1 year warranty
