CONCLUSION:

A complete inspection was conducted on Crane 2 (IMPSA Crane) it was found that Health and Safety was the major concern pertaining to the various sections of the crane. Access to the A-Frame, Personnel Lift, Machinery House (E-House), Walkways, Platforms and Driver Cab is extremely unsafe and it is recommended that the sections be declared unfit for use.

All Health and Safety concerns must be resolved before maintenance work is carried out on the main structure due to the safety of the persons working on the structure.

Listed below are examples of what should be refurbished, replaced:

Walkways
 Personnel Lift
 Cable Reel Platform
 Machinery House (E-House) Platform
 Driver Cab Platforms and Walkways
 Top Platforms
 Platforms and Walkways in general.

It is advised that once all the above Health and Safety concerns have been addressed, the sections must be inspected to ensure that it is safe to access the structure, only then can maintenance work be carried out.

Listed below are examples of what should be conducted on the main structure:

End Stoppers to be replaced (Gantry Traveling System).
 Anchor Point to be replaced (Gantry Traveling System).
 Gantry Traveling System to be refurbished (treated with anti corrosive coating)
 Horizontal, Vertical Leg and Diagonal Columns to be refurbished (treated with anti corrosive coating)
 Boom Section to be refurbished (treated with anti corrosive coating)
 A-Frame to be refurbished (treated with anti corrosive coating)

It is recommended in accordance with the Occupational Health and Safety Act and Regulations 85 of 1993, Construction Regulations, Structures 11(2)(b) *are carried out at least once every six months for the first two years and thereafter yearly*; this interval at the discretion of the Transnet technical department, Driven Machinery Regulations, Transportation plants 17 and Lifting machines, hand-powered lifting devices and lifting tackle 18; Lift, Escalator and Passenger Conveyor Regulations, Inspections and tests 6(1), the personnel lift is a rack and pinion lift and must be inspected *at intervals not exceeding 24 months thereafter or at shorter intervals according to the in-house risk assessment*. The Responsibilities of the User of Lifts, which explains the Regulations and the Standard applicable to conform is provided as a supporting attachment to this document.

The engineers report is provided as a supporting attachment to this document, confirming and reiterating similar opinions as captured in this report.

It is further recommended that all components of the Crane to be inspected in accordance with the applicable and relevant regulations and standards; similarly all operational cranes to be subjected to the same comprehensive inspection and evaluation.
