1. INVITATION TO BID AND PURPOSE

Professional Service Providers with relevant expertise and experience are herewith invited to submit bids to provide hydrogeological consulting services in the Western Cape Province. The services will be required on an as and when required basis and will primarily be rendered to municipalities in the Western Cape as part the Department of Local Government's support services to municipalities.

2. BACKGROUND

The Department of Local Government (the Department) is the lead Department responsible for the planning and implementation of drought response and water resilience interventions in Municipalities in the Western Cape as well as the lead department for the Provincial water risk. The Department has embarked on a process to coordinate the development of "Drought Response and Water Resilience Strategies and Action Plans" during the last five financial years particularly to support drought-stricken municipalities.

As part of these drought response and water resilience strategies and action plans, the Department adopted an approach to ensure domestic water security in all towns within the Western Cape. The approach included four focus areas, i.e., water source augmentation, water source management, water demand management

and water infrastructure development. Support focus areas includes water planning and water governance.

The Department has, however, observed a positive recovery in most parts of the Province as a result of the good rainfall during 2020 -2022 as well as the success of the implemented action plans. In 2023, there has however been renewed focus on planning for possible drought occurrences, as lower than normal rainfall have been received, and further predicted for the remainder of the year. This emphasizes the continued need for the Department to work towards water resilience, ensuring municipalities are better prepared for future drought occurrences.

Hydrogeological Services are therefore particularly required in support of groundwater augmentation action plans as well as for enhanced groundwater management and monitoring to ensure water security and resilience.

3. CONTRACT TERM AND TERMINATION

- **3.1.** The contract duration of the service provider will be for a period of 3 years from the date of commencement of the award.
- 3.2. The Department may cancel the agreement or temporarily suspend all or part of the services by giving 30 days' notice to the successful bidder, who shall immediately arrange to stop the performance of the services and minimize further expenditure, provided that the successful bidder shall there upon be entitled to payment in full for the services delivered, up to the date of cancellation or suspension.

4. COMPULSORY BRIEFING SESSION

4.1 A virtual compulsory briefing session will be held on the Microsoft Teams online platform on 29 August 2023 at 10h30. The session will be open at the afore-mentioned stated time. Attendees will be allowed access to the meeting from 10h30 with the Chairperson closing access at 11h00 whereafter the session will commence.

- 4.2 Prospective service providers must indicate their intention of attending the compulsory virtual briefing session by sending an email to lg.finance@westerncape.gov.za with the reference number: LG-01 2023-2024 stated in the subject line of such emails before or on 25 August 2023 by 16h00 latest. No requests will be considered after this cut-off date and time. The said email should clearly state the prospective service provider's representatives full name, official email address, and contact number.
- 4.3 Only representatives of service providers received as per point 4.2 on or before the before-mentioned due date will be invited and allowed access to the compulsory virtual briefing session. The meeting link will be sent on or before the close of business on 28 August 2023. If the said representative/s cannot attend, a separate email should be sent with the details of the replacement on or before the due date listed above. The meeting links should not be shared with non-representative/s.
- 4.4 The Chairperson will further use this information to prepare a pre-populated register to monitor and control access to the session. Access to the session will therefore be restricted to this pre-populated register. Upon closing access to the briefing session, the chairperson will allow for a formal introduction of representatives and confirm such attendance against the pre-populated register.
- 4.5 An automatic attendance register will be generated from MS Teams and compared against the verbal confirmations and will be considered as the official attendance register of the virtual compulsory briefing session.
- 4.6 The details disclosed at the compulsory briefing session shall be deemed to form part of these Terms of Reference once they have disclosed to all prospective service providers in attendance at the virtual compulsory briefing session.

The pricing for one GMP should assume a town of up to 10 production boreholes. In instances where a town has more than 10 production boreholes the quantity will be adjusted accordingly.

Depending on the given circumstances, which may include the municipal capacity, urgency for implementation and budget available, the implementation may range from dedicated hydrogeological support to general assistance, as defined below. It is required that prospective bidders provide applicable rates, based on the extent of the services required:

In the event of subsequent quarterly periods, some of the services may not be required consecutively. In such cases the client in consultation with the service provider may reduce the scope of the services and the rate provided as deemed appropriate.

f(1) Effective skills transfer and training of municipal officials form an important part of this subtask. It is expected that the identified municipal officials grow in their understanding and practical experience of groundwater monitoring. The Service Provider should demonstrate the effectiveness of skills transfer and training of municipal officials, by clearly outlining their understanding of the monitoring processes as well as ability to conduct monitoring rounds with limited supervision after each quarter.

SSW06.1 – Intensive Implementation of a groundwater management plan (per town with max 10 boreholes – per 3-month period)
