## 1. SCOPE OF WORK/SUPPLY

Broadband Infracore intends to install existing installed technologies (VRLA) and newer technology storage devices with front terminals at Broadband Infracore sites. Broadband Infracore will in addition, make use of security measures to safeguard energy storage devices at PoP sites where theft is prevalent under the following instances.

- Existing sites/Retro fitted sites
- New Indoor installations; and
- New outdoor installations.

## 2. SPECIFICATION OF PRODUCT OR GOODS

RFI will be based on the following already approved TE-NT-SP-0001 specification.
