PART A – THE TENDER

INTRODUCTION TO THE NRF

The National Research Foundation Act as amended, Act 19 of 2018, establishes the National Research Foundation (“NRF”) as the juristic legal entity that will contract with the awarded bidder. Please visit the NRF website (<https://www.nrf.ac.za>) for more information.

BACKGROUND TO SARAO

The South African Radio Astronomy Observatory (SARAO) is the National Research Foundation’s National Facility incorporating South Africa’s radio astronomy instruments and programmes such as the MeerKAT and KAT-7 telescopes in the Karoo in the Northern Cape, the Hartebeesthoek Radio Astronomy Observatory (HartRAO) in Gauteng, the African Very Long Baseline Interferometry (AVN) programme in nine African countries as well as the associated human capital development and commercialisation endeavours. More information about SARAO is available from www.sarao.ac.za More information about the international SKA project is available at www.skatelescope.org.

CONTEXT OF THE PROCUREMENT NEED

Since the commissioning of MeerKAT, the radio telescope built and operated by SARAO has exceeded expectations, made an invaluable contribution to the scientific community and has been an excellent precursor for the SKA project. One of the key objectives of the current MeerKAT Extension project is to maximise opportunities, scientific and otherwise, that arise from investment in MeerKAT.

The SARAO Science Operations and Commissioning Team performs the analysis, calibration of the instrument and sets up operational procedures so that the telescopes can function as part of the MeerKAT telescope array. It is expected that the MeerKAT Extension project will significantly increase the telescope’s demand for storage and processing. This is due to the increase in the number of receptors and increase in the resolution.

This bid is for the supply and delivery of additional processing servers and storage for the commissioning of the MeerKAT and MeerKAT extension projects.

Bidding entities must either be the Original Equipment Manufacturer (OEM) for the equipment specified, or an authorised reseller.

The current network for the high speed storage is based on Nvidia/Mellanox, and Cisco equipment, and this new systems should be compatible with these manufacturers.
