Technical will form part of functionality. The technical evaluation procedure is specific for voltage transformers of each voltage level due to different technical requirements. All bidders must submit complete documents required for the technical evaluation (Table 1). The evaluation procedure has three parts i.e., Desktop, Objective and Factory assessments. Factory assessments shall be undertaken post contract award, upon placement of the first order.

All bidders who are supplying VTs to Eskom currently and have not changed their product and their manufacturing plant (factory) will be exempted from the technical evaluation, but they must still submit all required technical documents listed in Table 1 and complete the declaration form to indicate if there are changes to their product or not. Eskom will assess the changes and decide if the supplier qualifies or not.

i) Desktop Evaluation:

This part of the evaluation starts when submissions are opened for the first time. The evaluation is done using the documents listed in Table 1 below and is done by Technical Evaluation Team (TET) members.

Table 1: Required Technical Documents

Items	Required Documents
1	Completed Technical Schedule (A & B).
2	Deviations Schedule (only if there are deviations).
3	Outline Drawing for the VT
4	Outline Drawing of Insulator(s) used with the VT
5	Test Reports
6	Technical Manual addressing Packaging, Transportation, Installation, Storage & Maintenance.

The documents in table 1 are required to carry out the desktop evaluation and to award scores to bidders. NB: information submitted including test reports must be in English and units on drawings must be in System International (SI) units. If the original test report is not in English, it must be translated to English and both the original report, and the translated report must be submitted.

Desktop evaluation will have a total allocation of 100 percentage points. Out of the 100 percentage points, 50 percentage points will

be based on documents and the other 50 percent points will be based on test reports as captured in table 2 below.

Table 2: Point Allocation for Desktop Evaluation

Activity	Weight
Completed Technical Schedule (A & B)	35
Outline drawing	5
Insulator Drawing	5
Manual	5
Test Reports	50

a. Technical schedule:

The technical schedule will be scored based on completeness of information provided by supplier. Non-compliance or deviation to primary terminals required by Eskom will have a 35 points penalty and no further scoring will take place (i.e., the supplier will be deemed to have failed the desktop evaluation). If the primary terminals are compliant with Eskom requirements, the rest of the items not completed in the technical schedule will have 1 point penalty.

b. Outline Drawing:

The units used on the outline drawing must be as per the International System of Units (SI units). The drawing must show the outline (side view), top view, mounting arrangement (bottom view), earthing details and HV terminal details of the VT. Each of the above listed requirements will score 1 point each.

c. Insulator Drawing:

The units used on the drawing must be as per the International System of Units (SI units). The drawing must show the outline together with the relevant dimensions to score 5 points

d. Manual:

The manual submitted must address packaging, transportation, installation, storage, and maintenance. A point will be allocated for each of these required items.

e. Test reports:

The tests required are different across voltages levels. The tests required per voltage level and test names shall be clearly specified in the technical schedule(s). Depending on the number of tests required, the submitted test reports will be divided by the total number of tests required in the technical schedule and multiplied by 50 to give a total of 50 percentage points. As an example, if a particular VT requires 10 type tests and a supplier submits 4 test reports, their score will be calculated as follows:

$$\text{Tests Score} = 4/10 \times 50 = 20 \text{ points}$$

The minimum threshold required to pass the desktop top evaluation is 70%.

The outstanding items will then be used as condition of contract award if the supplier is successful.

ii) Objective Assessment (Contractual Requirements):

All items in the desktop assessment which are not fulfilled by successful OEMs (i.e., OEMs who passed the desktop evaluation) will form part of the objective assessment and be used as conditions of contract award. Eskom will negotiate with successful suppliers to indicate whether they are willing to comply with Eskom's requirements and by when (date). OEMs who are unwilling to meet Eskom's requirements or fail to comply with Eskom's requirements on the agreed date will be disqualified.

iii) Factory and Practical Assessment:

This assessment will be done post contract award, upon placement of the first order. The OEM will inform Eskom at least two months in advance of the date upon which the ordered units will be completed and ready for routine testing. Eskom will then send its representatives to do the factory evaluation and to witness the routine testing of the ordered units. Eskom reserves the right to waive the factory assessment where Eskom has assessed the OEM factory before.

Fixed ZAR Option (Payment Method 3)

This option is available to those tenderers who are the direct importers of the goods/services for which they have tendered, but do not find Payment Methods 1A, 1B or 2 and allows tenderers to be responsible for the foreign currency and exchange rate risk. If a tenderer selects this payment method, the process is as follows:

- Eskom and the successful tender will engage, on a simultaneous basis, with their respective bankers and compare the exchange rate/s obtained. This is done to ensure that any exchange rate/s used is/are market related.
- Tenderers will be required to match or better the exchange rate/s obtained by Eskom. If the tenderer's exchange rate/s is/are more expensive than the exchange rate/s indicated by Eskom, the exchange rate/s to convert the foreign values into ZAR will be the Eskom exchange rate/s.
- Once the exchange rate/s has/have been agreed by both parties, Eskom will not be liable for any further exchange rate adjustments.

From a Commercial perspective, please take note of the following:

- The foreign currency and foreign currency amount/s that Eskom is/are at risk to, need/s to be indicated in the pricing schedule submitted as part of the tender. If the pricing schedule does not allow for it, the foreign currency and foreign currency amount/s must be indicated in a covering letter.
- The exchange rate to be used in the tender submission is the exchange rate sourced from the South African Reserve Bank on the date the tender is advertised/published.
- Due to the payments being made in ZAR, but based on an agreed exchange rate, the tenderer will be required to submit proof of importation at time of payment.

Applicable (Y/N)

Please note: Eskom will require substantiating proof of importation at the time of invoicing.

Where the supplier, previously imported goods into stock for delivery to various customers, including Eskom, the price quoted must be in South African Rand. In such cases, Eskom will not undertake any foreign exchange commitment or arrange forward cover.

Take note of the following:

Service-related payment:

When specialist skills are required in South Africa, the local supplier will source the appropriate talent from their network of specialist companies overseas. The specialist is then brought into the country (South Africa) on one of two possible methodologies.

1) Secondment

In this approach, the foreign specialist retains their employment contract with their home unit (Employer overseas) but are seconded to the local company that has a contract with Eskom to work under the direction and control of the local management. Their salaries are paid to the foreign specialist by their home country and that foreign entity then invoices the local supplier (South Africa) in foreign currency for the cost relating to such employees.

The invoices would typically be in Euro or GBP, this methodology is usually for short to medium term engagements.

Documents to be attached for payment:

- Commercial invoice from the specialist company
- Local invoice (South African company making use of the specialist services)
- Passport of the specialist and valid work permit
- Activity schedule signed by the contract manager

2) Payroll Transfer

In this approach, the employee's contract with the overseas employer will be suspended and the specialist takes up a local contract with the local company. The remuneration is then **ZAR** based, the overseas employer is unable to provide the foreign invoice because the employment with the specialist is suspended this methodology is usually favoured for long term engagement. There is no foreign commitment, and the contract will be in ZAR.

PART 2: EXCHANGE RATES

The tenderer shall use the exchange rate as at 12H00 on the date of the advertisement of the tender. The source of the exchange rates shall be the South African Reserve Bank (www.resbank.co.za)
