

TE/2025/04/0005/92908/RFP DESIGN, SUPPLY, DELIVER AND CONSTRUCT THE PERIMETER FENCE WITH INTRUSION DETECTION AT UITENHAGE (SWARTKOPS), FOR A PERIOD OF 06 MONTHS

1. Site plan where the security room will be.
This was covered in the previous addendum – the installation will happen in the current control room.
2. This is all new infrastructure points to me or is there already existing cables on site already.
No existing cables. Supplier to provide and cost for all new cabling. The location of the various electrical kiosks where connection can be made was indicated in the previous addendum
3. Can we selected ourselves where to install the cameras or will Transnet give all bidders the same points to consider for bidding purpose.
Supplier to decide themselves , the entire perimeter needs to be covered in terms of visuals. There should be no blind spots for security with a type of camera with minimum specification as per section 4.3 in the specifications. The section of the perimeter requiring PTZs was shown in the previous addendum.
4. What size hard drive do you require
This was covered in section 2.3 of the specification under the Heading: Intrusion Detection System
5. Will the camera be wifi camera or cables.
Cable
6. The pricing schedule is giving a sum of 1 but the Scope of works is also not indicating a clear quantity of cameras
See answer to Question 3. We have indicated the area requiring PTZs. The remainder is to be covered by Fixed cameras which aligns to the requirements in terms of locational accuracy with the security having sight of the entire perimeter
