1. BACKGROUND

The Gauteng Agroprocessing Program is premised on the objective of developing a conducive environment for new players, in order to increase the participation of Agroprocessing Small Medium Micro Enterprises (SMME) in the value-chain. The approach of the Gauteng Department of Agriculture and Rural Development (“the Department”) is that of enhancing value-chain integration and fostering development of market access. Therefore, the investments made by the Department are geared towards growing this industry, thus giving a solid foundation for the empowerment of stakeholders, such as smallholder enterprises, to participate in the mainstream economy of the Gauteng Province. This TOR is linked to the two (2) major initiatives of Agriculture and Agroprocessing. The first is the Programme to Commercialise 53 smallholder farmers across the five (5) value chains namely Poultry, Grains, Horticulture, Piggery and Red Meat. There are Agroprocessing initiatives which includes the establishment of five (5) township processing hubs in each of the 5 corridors. This will lead to a competitive agro-processing sector contributing to job creation and focussing primarily on the Southern and Western Corridors. One of the value chains that have been identified as catalyst for development to fulfil the 2030 Gauteng Growth Plan in the 6th Administration (GGT 2030) is the Grain Milling Industry.

The South African grain milling industry plays a vital role in providing sufficient quantities of processed grains necessary for basic staple food requirements. The grain milling industry mainly consist of the milling of both white and yellow maize for human and animal consumption respectively. The Gauteng Province is generally a limited contributor in terms of grain production, but is well established in terms of grain milling and related processing facilities. Maize production in Gauteng is concentrated in the areas adjacent to major maize producing provinces, such as the Free State, North West and Mpumalanga, and accordingly include regions in the areas of jurisdiction of the Sedibeng District Municipality, the West Rand District Municipality and the City of Tshwane Metropolitan Municipality. The grain milling industry is well established in Gauteng and largely dominated by few role players that are mostly vertically integrated. These role players are Ruto Mills, Pioneer Foods, Premier Foods, Tiger Mills and Pride Mills.

One of the biggest input costs for small medium milling plants in Gauteng Province is raw materials in the form of maize. This is evident from the number of maize input requests Gauteng Agriculture has received in the past financial years from small scale to medium scale millers. Grade 1 White Maize for processing Mielie Meal for human consumption is the most wanted raw material owing to few small scale to medium size Maize milling plants scattered around Gauteng. Yellow Maize for Animal feed manufacturing is the second most wanted raw material for small scale to medium animal feed manufacturing firms.

The South African animal feed industry comprises of approximately 100–150 feed millers of different sizes. The industry is made up of two different manufacturing sectors i.e. the formal animal feed manufacturing sector and the informal animal feed manufacturing sector. The formal animal feed manufacturing sector, represented by members of the Animal Feed Manufacturers Association (AFMA), supplies 55-60% of the total animal feed production in the country. The informal animal feed manufacturing sector is composed mainly of small-scale feedlots, small manufacturers, the pet industry and home-based mixers. Maize alone makes up as much as 49.8% of up to 60 raw materials that are combined in making balanced animal feed in South Africa. Other important raw materials are wheat, soybean (60% of national production), sunflower, sorghum, groundnuts and fish meal. Maize and soybean oilcake combined also make up around 65% of raw material costs for feed production. The demand for animal feeds is likely to continue to grow with increased demand for animal products, due to population growth. Yellow Maize, Soybean and Sunflower Seeds are key inputs in the manufacturing of animal feed.

2. OBJECTIVES

The objectives of the proposed project are as follows:

- Make available just in time delivery of White Maize (WM1) raw material to small scale medium milling plants in order to reduce the costs of doing business and to expand access to Agri-Food value chains opportunities.
- Make available just in time delivery of Yellow Maize (YM1) raw materials to small scale medium feed milling plants in order to reduce the costs of doing business and to expand access to Agri-Food value chains opportunities; and

- Make available just in time delivery of Sunflower Seed raw materials to a medium scale milling plant in order to reduce the costs of doing business and to expand access to Agri-Food value chains opportunities.
