# Objective

---

To obtain a service provider who will provide tyre management services, tyre maintenance services, new industrial tyre supply, and re-treading of industrial tyres for Transnet port terminals for a five-year period.

# Scope of Work

- **Supply of new tyres** (Service provider to supply tyres as per appendix D , cost of replacement, lead time for the delivery of new tyres is within 12 hours after having provided a purchase order)
- **Re-treading of Tyres** (The Service Provider will be required to re-tread tyres in accordance with the specified specifications (e.g. SANS), and the process will be carried out in collaboration with TPT personnel. )
- **Repairs of tyres & rims** (Repairable tyres and rims will be identified by the service provider in collaboration with the TPT Tyre Supervisor, as is done with re-treading and scrapping of tyres. The warrant must be noted in the scope of work on all tyre and rim repairs .)
- **Condition monitoring of tyre rims** (The Service provider is responsible for monitoring the condition of all tyre rims, report to be provided every 2 weeks and progress report (detailed record) must be submitted one month after the contract award.)
- **Tyre Management** (The contractor must have a tyre management software system that can generate tasks for planned maintenance services and submit them to TPT technical and project manager for review and refinement, performance management, detect wear patterns and alignments, tyre inventory requirements, and historical tyre pressure data).
- **Onsite Tyre inflations service using a bakkie** (mobile) and/or a land-based (stationary) compressor appropriately rated and capable of inflating all tyres used in the Terminal.
- Service provider to provide their own office space in the form of a Park Home and TPT will provide electricity and water.
- Service provider to provide the tyre fitment/stripping/pressing machines, and where these are not available at TPT site.

# Scope of Work
