SECTION 3: BACKGROUND, OVERVIEW AND SCOPE OF REQUIREMENTS

1 BACKGROUND

Transnet Freight Rail owns and operates 47 diesel depots across the country. Each Depot has diesel storage tank and refuelling pumps with varied capacities for purposes of storing diesel and reticulating diesel into refuelling pumps used for the refuelling of diesel locomotives. Prior to 1 April 2010, the diesel storage facilities were not required to have a registration certificate in terms of the Atmospheric Pollution Prevention Act, 1965 ("APPA") since it was not regarded as a scheduled activity. On 22 November 2013, the Minister of Water and Environmental Affairs published the Notice which provided that an Atmospheric Emission License (AEL) is required where the threshold for the storing of fuel is more than 1000m³.

The storage and handling of petroleum products where the storage capacity exceeds 1000m³, is a listed activity in terms of the National Environmental Management: Air Quality Act No 39 of 2004 and requires an AEL. TFR has five Atmospheric Emission Licenses (AEL) with the conditions to monitor atmospheric emissions.

It is against this background that (TFR) seeks to appoint a competent Service Provider to monitor atmospheric emissions at five (5) selected diesel depots countrywide. These are:-

- i. iNsezi Depot (Kwa-Zulu Natal Province);
- ii. Millsite Depot (Gauteng Province);
- iii. Ermelo Depot (Mpumalanga Province);
- iv. Wentworth (Kwa-Zulu Natal Province); and
- v. Masons Mill (Kwa-Zulu Natal Province)

Each of the diesel storage tanks has a combined storage capacity greater than one thousand cubic metres (1000m³).

2 EXECUTIVE OVERVIEW

Whereas Transnet is seeking to appoint a suitably qualified Service Provider to conduct air quality monitoring at Transnet Freight Rail (TFR) diesel refuelling sites as required by the Atmospheric Emission Licenses (AELs) for a period of five (5) years, it also seeks to improve its current processes for providing these Services to its end user community throughout its locations.

The selected Supplier/Service provider(s) must share in the mission and business objectives of Transnet. These mutual goals will be met by meeting contractual requirements and new challenges in an environment of teamwork, joint participation, flexibility, innovation and open communications. In this spirit of partnership, Transnet and its Supplier/Service provider(s) will study the current ways they do business to enhance current practices and support processes and systems. Such a partnership will allow Transnet to reach higher levels of quality, service and profitability.

TFR also owns diesel storage tanks for refuelling of locomotives. Air quality monitoring in the surroundings of these tanks is required to meet legislative requirements.

Specifically, Transnet seeks to benefit from this partnership in the following ways:

- 2.1 Transnet must receive reduced cost of acquisition and improved service benefits resulting from the Supplier/Service provider's economies of scale and streamlined service processes.
- 2.2 Transnet must achieve appropriate availability that meets user needs while reducing costs for both Transnet and the chosen Supplier/Service provider(s).

- 2.3 Transnet must receive proactive improvements from the Supplier/Service provider with respect to supply/provision of Goods/Services and related processes.
- 2.4 Transnet's overall competitive advantage must be strengthened by the chosen Supplier/Service provider's leading edge technology and service delivery systems.
- 2.5 Transnet end users must be able to rely on the chosen Supplier/Service provider's personnel for service enquiries, recommendations and substitutions.
