

Awareness Training: Keep your work area clean!

1. Always dispose of waste paper, cigarette butts, empty food containers, cans, plastic containers, etc., into a black plastic bag – Ask your supervisor to make it available.
2. Always fill the bags to capacity. This will save on black bags (cost saving) and minimize additional black plastic bag (plastic waste).
3. Close the black bags with a knot to prevent waste from falling out during transport or storage.
4. Always dispose of waste at an allocated municipal dump site. Keep record of all waste quantities being disposed of.
5. Always dispose of wet concrete and soil contaminated with wet concrete into green plastic bags (for large amounts dispose of it into wheelbarrows).
6. Always dispose of spoil from the mast holes at a designated borrow pit.
