

TENDERS AND CONTRACTS MANAGEMENT

E : scm.tenders19@capetown.gov.za

20 MARCH 2026

NOTICE TO TENDERERS NO: 2
(Pages: 8)

TENDER NO: 165G/2025/26

DESCRIPTION: THE SUPPLY AND DELIVERY OF CHEMICALS AND CONSUMABLES FOR THE CITY OF CAPE TOWN

TENDER BOX NO: 232

CLOSING DATE: 25 MARCH 2025

Dear Sir/Madam

This notice to tenderers forms an integral part of the Contract and is an addendum, which must be recorded in Schedule 12: Record of Addenda to Tender Documents and bound within the 'Returnable Schedules'.

It was noted in the tender that the overseas pricelist-based adjustments would not be applicable - Schedule F.1 (G).

This was identified as a problem as many of the items are made in the USA, using components from around the world and with the current political tendencies, it is very hard to predict what the base costs of the manufacturers will be.

For that reason, we are making the option available to choose Oversees MPL as a CPA mechanism.

This Notice 2 contains replacement pages replacing some of the pages from the tender document that was advertised, as follows:

- **Replacement pages 162A to 162D replacing page 162**

This notice also addresses queries that were submitted to City of Cape Town in respect of this tender as follows:

Questions and Answers

1. GROUP 85: Multiresidue Standard Mixes

Item 6: Methylene Chloride, 1 mL/ampul

What should it be mixed with and what is the concentration?

Response:

See details of standard on following page

2. Group 20:

Question:

Please clarify what is needed for item 7 and 13? A CRM, a Reference Standard or just as Analytical Standard?

Response:

Item 7 and 13 is Analytical standards. It was grouped with all items in Group 20 because it's for the same instrument.

- **Replacement page 78B replacing page 78A of the tender document.**

3. Kindly assist to clarify the specifications for group 19, item number 8.

Please be advised that the TU5200 does not have a standard set ranging up to 4000 NTU.

Can you specify which instrument item 8 is for.

Response:

The Turbidity Standard set must be Sabala Formazin Primary Calibration Standards in sealed vials.

The Standards must include <0.1, 20, 200, 1000 and 4000 NTU standards.

The standard vials must be compatible with the HACH 2100N Turbidimeter

Tenderers are to return a signed copy of this notice/addendum with the submission of their tender and record the notice on Schedule F.12: record of addenda to tender documents.

Yours Sincerely

.....
