- 4.2. In cases where organs of state intend to use Regulation 3(2) of the Regulations, which states that, if it is unclear whether the 80/20 or 90/10 preference point system applies, an organ of state must, in the tender documents, stipulate in the case of—
  - (a) an invitation for tender for income-generating contracts, that either the 80/20 or 90/10 preference point system will apply and that the highest acceptable tender will be used to determine the applicable preference point system; or
  - (b) any other invitation for tender, that either the 80/20 or 90/10 preference point system will apply and that the lowest acceptable tender will be used to determine the applicable preference point system,then the organ of state must indicate the points allocated for specific goals for both the 90/10 and 80/20 preference point system.

## 1 DESCRIPTION

Appointment of a suitably qualified service provider to review, assess, and enhance SAWS ICT frameworks and standards to ensure alignment with legislative requirements, governance frameworks, cybersecurity best practices, and organisational objectives. The review will include gap analysis, recommendations, and an implementation roadmap for adoption across SAWS.

## 2 INTRODUCTION

The South African Weather Service (SAWS) is a public entity of the Department of Forestry, Fisheries and the Environment (DFFE) and derives its mandate from the South African Weather Service Act (No 8 of 2001 as amended). The public entity is listed as a Schedule 3A Public Entity in terms of the Public Finance Management Act (PFMA).

SAWS is tasked with providing timely and accurate scientific data in the field of meteorology to the broader South African society: a combination of both public good and commercial services. The organization plays a vital role in South African public life, not just as a provider of key services, but also in empowering citizens to adapt the effects of the ever-changing weather.

## 3 BACKGROUND

The South African Weather Service (SAWS) has developed a suite of ICT frameworks and standards to strengthen ICT governance, cybersecurity, risk management, service delivery, and technology management across the organisation. These frameworks and standards were developed to support compliance with applicable legislative and regulatory requirements, including the Corporate Governance of ICT Policy Framework (CGICTPF), the Protection of Personal Information Act (POPIA), the Public Finance Management Act (PFMA), and recognised industry best practices.

SAWS identified the need to further strengthen its ICT governance and control environment. As part of continuous improvement and governance maturity, the developed ICT frameworks and standards require an independent review to validate their adequacy, completeness, alignment with current business requirements, and adherence to industry best practices.

The review will assess the effectiveness of the frameworks and standards, identify gaps and improvement opportunities, and provide recommendations to ensure that SAWS adopts a robust, sustainable, and future-ready ICT governance framework. The outcome of this review will support improved decision-making, regulatory compliance, cybersecurity resilience, risk management, and the effective management of information and technology resources across the organisation.

#### 4 REQUIREMENT / SCOPE OF WORK

The South African Weather Service (SAWS) requires the services of a suitably qualified and experienced service provider to conduct an independent review, assessment, and enhancement of its ICT frameworks and standards to ensure alignment with legislative requirements, governance frameworks, cybersecurity best practices, and organisational objectives.

The appointed service provider shall be required to:

Review and assess the existing SAWS ICT frameworks and standards, including their adequacy, completeness, relevance, and effectiveness.

Evaluate the alignment of the frameworks and standards with:

- Corporate Governance of ICT Policy Framework (CGICTPF);

- Protection of Personal Information Act (POPIA);
- National and international ICT governance and cybersecurity best practices;
- Relevant ISO standards, including ISO 27001, ISO 20000, and COBIT, where applicable.

Conduct a gap analysis to identify weaknesses, inconsistencies, overlaps, omissions, and areas requiring improvement.

Assess whether the frameworks and standards adequately address:

- ICT governance;
- Information security and cybersecurity;
- ICT risk management;
- Business continuity and disaster recovery;
- Data governance and information management;
- ICT operations and service management;
- Infrastructure and cloud governance;
- Application and systems management.

Engage relevant SAWS stakeholders through workshops, interviews, or consultations to gather input and validate findings.

Benchmark the frameworks and standards against industry best practices and comparable organisations.

---

Provide practical recommendations to address identified gaps and improve governance, compliance, security, operational effectiveness, and overall ICT maturity.

Update and refine the existing frameworks and standards where required.

Develop an implementation roadmap outlining recommended actions, priorities, dependencies, timelines, and key success factors.

Present findings, recommendations, and the implementation roadmap to SAWS management.

### **Deliverables**

The successful service provider shall provide the following deliverables:

- Inception Report detailing the review methodology and project plan.
