

## **REQUEST FOR PROPOSAL**

**FOR APPOINTMENT OF A SERVICE PROVIDER TO UNDERTAKE THE LANDSCAPE  
ANALYSIS AND DEVELOP A BIOENTREPRENEURSHIP PROGRAMME FOR  
IMPLEMENTATION BY THE TECHNOLOGY INNOVATION AGENCY**

## 1. INTRODUCTION

- 1.1 The National System of Innovation in South Africa is still very young and fragmented and the flow of technology and information amongst people, enterprises and institutions is limited. The inability of academic research to reach the market as products and services is limiting economic development especially about technology innovation.
- 1.2 Technology Innovation Agency (TIA, organisation) an entity of the Department of Science, Technology and Innovation (DSTI ) was established in terms of the TIA Act (Act No. 26 of 2008), with the objective to stimulate and intensify technological innovation in order to improve economic growth and the quality of life of all South Africans by developing and exploiting technological innovations, as the value chain depicted below.

## 2. PURPOSE

TIA would like to request for a suitably qualified and experienced Consultant, Expert or an Institution which will demonstrate the ability to engage the relevant stakeholders to solicit inputs and undertake a landscape analysis to develop a national Bio-entrepreneurship programme that will be hosted and managed by the Technology Innovation Agency (TIA).

### **3. BACKGROUND**

The present use of the term bio-entrepreneurship refers to the use of any idea from biology that can be utilised to serve humanity and acquire profit by establishing a business. Furthermore, and as referenced from literature, bio-entrepreneurship involves building an enterprise that can develop and commercialise the products of biotechnology.

In the past financial years, TIA has previously hosted a number of programmes to support entrepreneurs in the life sciences or technology and innovation space. In addition, TIA has also conducted a study to review the performance of some of these programmes. One of the observations that was made in the report is the general need to support technology-based business enterprises in managing a new company and that the funding support after such programmes are crucial to the success of these technology-related start-ups.

It is as a result of this outcome and additional recommendations that were highlighted in the previous study including the support that TIA is rendering to bio-based enterprises in line with government's policies on the Bioeconomy Strategy, STI-Decadal Plan-2022-2032 etc, that TIA seeks the expertise of a Service Provider to develop a bio-entrepreneurship programme. The Service Provider will undertake a landscape analysis of the activities related to the bio-entrepreneurship support in South Africa, engage the relevant stakeholders to solicit their inputs and based on the outcome of the analysis, develop a national bio-entrepreneurship programme for implementation by the Technology Innovation Agency.

#### 4. SCOPE OF WORK

In relation to the detailed proposal, the Service Provider will be expected to deliver on the following objectives:

- a) Undertake a national landscape analysis to understand the current role players providing bio-entrepreneurship support such as Universities, Incubators, Accelerators and various providers of mentorship programmes such as Venture Studios.
- b) Engage with providers and recipients of bio-entrepreneurship support to understand the strengths and limitations of existing offerings and to determine if existing programmes are effective.
- c) Based on inputs from stakeholders assess if there is a need for a new and/or improved bio-entrepreneurship programme including the opportunities for collaborations between providers of existing programmes.
- d) Solicit inputs from stakeholders on the design of the bio-entrepreneurship programme to be established. Considerations are:
  - i. protection of ideas, understanding of intellectual property rights (IPR), knowledge of the legal implications associated with IPR;
  - ii. consumer analysis, validation of marketing assumptions and identifying important market segments;
  - iii. recognising regulatory and reimbursement environment in local and international markets;
  - iv. understanding regulatory approval for their product or service;
  - v. knowledge about stages of new product development;
  - vi. understanding management of R&D portfolio, innovation and business plan development writing;
  - vii. learning about the manufacturing of products;
  - viii. developing and interpreting capitalisation tables, interpretation of basic finances and deal negotiation;
  - ix. accessibility of bio-innovations to developing countries (costing and developmental priorities);
  - x. hands-on wet lab management; and
  - xi. mentor, entrepreneur-in-residence and coach participation.

- e) How the bio-entrepreneurship programme should be implemented financed and how its outputs and impact should be measured.
- f) While the programme is meant to consider and address challenges experienced by entrepreneurs locally, an analysis of appropriate international offerings to assess how effective bio-entrepreneurship programmes are rendered elsewhere in the world (United States and Canada, Europe and Japan, Hong Kong, Australia, Singapore, Korea, China and India for example) should also be incorporated in the study. A mix of formal and short courses, as well as fellowships, would be considered and would include aspects of workforce development. Examples are:
- i. <https://seed.nih.gov/entrepreneurial-training/bioecapstone>
  - ii. <https://www.innovation.uzh.ch/de/training-courses/bei-program.html>
  - iii. <https://www.cbs.dk/en/study/graduate/msc-in-business-administration-and-bioentrepreneurship>
  - iv. <https://kscste.kerala.gov.in/bioentrepreneurship-certification-programme/>
  - v. <https://case.edu/step/entrepreneurial-biotechnology>
  - vi. <https://www.ntu.edu.sg/sbs/admissions/programmes/graduate/research/curriculum-course/bs7016-bioentrepreneurship>.
- g) Draw up a proforma budget required to establish and implement this programme over three (3) years and beyond.

## 5. EXPECTED OUTPUT

The outputs expected of the Service Provider will include the following:

### Phase I

- Drawing directly from the Terms of Reference (ToR), provide a detailed project plan incorporating research methodology (ies) that are going to be used to undertake the landscape analysis.

### Phase II

- Undertake stakeholder consultation sessions (physical and/or online) with various players from the NSI such as HEIs, Science Councils, Start-Ups, Venture Capital Companies, Accelerators, Incubators, TIA-supported Technology Platforms,

Mentorship programmes etc. to establish the bio-entrepreneurship programme. It is key that the final report incorporates the challenges, issues and the proposed solutions of the various stakeholders.

### **Phase III**

- Design a comprehensive bio-entrepreneurship programme based on consensus from stakeholders and informed by credible trends from international experience this will inform the design, curriculum and the operational and delivery model of the programme as well as the metrics of measuring its outputs and impact. Draw up a financial plan and/or budget (3-year projections) related to the establishment and the implementation of the programme.
