

1	SINGLE PHASE AC MOTOR pannel	10	single phase forward and reverse panel(manual/rotary switch, semi-auto and fully auto)
2	3 PHASE INDUCTION MOTORS	10	three phase forward and reverse panel(manual/rotary switch, semi-auto and fully auto)
3	TWO SPEED MOTOR	6	Separate Winding Two Speed Motors have two separate dedicated windings for low and high speed
4	SINGLE PHASE AUTO TRANSFORMER STARTER	6	Single-phase tapped auto transformer one of them is autotransformer starter, .
5	THREE PHASE AUTO TRANSFORMER STARTER	6	The autotransformer starter can be used for starting both star and delta connected 3-phase induction motors. In this method, the starting current of the motor is limited by using a 3-phase autotransformer to decrease the initial applied voltage to the starter
6	3 SINGLE PHASE KILLO-WATT HOUR PANEL	6	energy meter/KWH Meter panel(3 x single phase meters)
7	3 PHASE KILLO-WATT HOUR PANEL	6	energy meter/KWH Meter panel(3 phase meter)
8	AUTOMATIC STAR-DELTA PANEL TIMER CONTROLLED	6	10 Kilo watt 3 phase motor control by timer
9	AUTOMATIC STAR-DELTA PANEL OUSH BUTTON	6	10 Kilo watt 3 phase motor control by push button
10	3-5 STEP RESISTANCE STARTER	6	In a rotor resistance starter, a star connected variable resistance is connected
11	3 PHASE FORWARD/ REVERSE STARTER PANEL	6	In this motor starter, there are four Contactors and switches (Two ON-Push and OFF-Push)
12	SINGLE PHASE FORWARD/ REVERSE STARTER PANEL	6	A forward/reverse magnetic motor starter is constructed from two regular contactors installed with a mechanical interlock that prevents both coils from pulling in simultaneously.
13	SINGLE PHASE DIRECT ON-LINE STARTERS	6	Direct on line (DOL) motor starting is when a motor is started at full load, with full line voltage applied to motor termina
14	3 PHASE DIRECT ON-LINE STARTER	6	Direct on line (DOL) motor starting is when a motor is started at full load, with full line voltage applied to motor termina
15	2-SPEED MOTOR STRTER PANNEL AUTOMATIC	4	ITS MOTOR WHICH THE SPEED IS ALTERED BY CHANGING NUMBER OF POLES
16	2-SPEED MOTOR STRTER PANNEL MANUAL	6	ITS MOTOR WHICH THE SPEED IS ALTERED BY CHANGING NUMBER OF POLES

17	POTENTIAL AND CURRENT TRANSFORMERS	6	A current transformer (CT) is a type of transformer that is used to reduce or multiply an alternating current (AC). It produces a current in its secondary which is proportional to the current in its primary. A potential transformer (P.T.) is an instrument transformer which is used for the protection and measurement purposes in the power systems. A potential transformer is mainly used to measure high alternating voltage in a power system
18	SINGLE PHASE DOMESTIC INSTALLATION TEST PANNEL	3	PANEL FOR BUILDING HOUSE OR INDUSTRIAL INSTALLATION
19	THREE PHASE SEQUENCE STARTER PANNEL	4	two or three motors 10 Kilo watt controlled sequency
20	SINGLE PHASE SQUIRREL CAGE ASYNCHRONOUS MOTOR	3	SINGLE PHASE SQUIRREL CAGE ASYNCHRONOUS MOTER
22	THREE PHASE SQUIRREL CAGE ASYNCHRONOUS MOTOR	3	THREE PHASE SQUIRRE CAGE ASYNCHRONOUS MOTOR
