

CLARIFICATION LETTER

DATE: 20 JANUARY 2022

ENQUIRY NO: MWP1062TX

DESCRIPTION OF SERVICES: THE PROVISION OF GEOTECHNICAL SERVICES FOR TRANSMISSION ENGINEERING FOR A PERIOD OF FIVE (5) YEARS ON AN AS AND WHEN REQUIRED BASIS.

CLARIFICATION NO: 2

Dear Sir / Madam,

Please take note of the following questions raised and answered

Opening Statement		
There are two Technical Evaluations; one (1) for Geotechnical Engineering Laboratory Services and the other one (1) for Geotechnical Engineering Professional Services (as per page 16 of Invitation to Tender Document, Tender Technical Evaluation Strategy for Geotechnical Laboratories, and Tender Technical Evaluation Strategy for Geotechnical Consultants respectively).		
	Question	Answer
1	Are the service providers expected to provide both Laboratory and Professional services or just one of the services?	We require two different types of service providers, consulting services or laboratory services. If you are a consultant you tender for the consultant part, if you are a laboratory you tender for the laboratory part
2	Can a service provider tender for one of the services and not the other?	if you are a consulting company that also has a geotechnical lab then you can tender for both
3	If a service provider want to tender for both; do they have to submit two separate tender documents?	Yes. As we would like to establish a panel with a bucket of consultants that we can approach for full Geotech services (fieldwork, lab work and reporting) and a group of labs that we can approach just for equipment and lab services only, when we are doing work in-house. Please do not submit a tender on behalf of a lab. We want the actual labs to put in their bid.

Yours faithfully,

Bev Proctor-Golding
Procurement Manager
