2. OVERVIEW OF LAND BANK

Established in 1912 to promote agricultural and rural development, the Land Bank provides production, instalment sale finance, and medium-term or mortgage loans to emerging and commercial farmers. From time to time, the Bank also administers other government programmes, such as drought relief schemes and flood assistance. The Land Bank is wholly-owned by the South African government, and is in turn the sole shareholder of LBIC and LBLIC, which provide insurance products in the agricultural sector.

The Bank's objectives flow from the Land Bank Act, No. 15 of 2002, and are aligned with government policies and the country's socio-economic needs. The Bank is expected to play a pivotal role in advancing agriculture and rural development. Its broad mandate, as expressed in the Land Bank Act, covers 11 objectives:

- Equitable ownership of agricultural land, in particular increasing the ownership of agricultural land by historically disadvantaged persons
- Agrarian reform, land redistribution or development programmes aimed at historically disadvantaged persons
- Land access for agricultural purposes
- Agricultural entrepreneurship
- Removal of the legacy of racial and gender discrimination in agriculture
- Enhancing productivity, profitability, investment and innovation
- Growth of the agricultural sector and better use of land
- Environmental sustainability of land and related natural resources
- Rural development and job creation
- Commercial agriculture
- Food security

Land Bank is committed to contributing to socio-economic transformation in South Africa and will therefore be contributing to the Preference System of all suppliers who are compliant to the Broad-Based Black Economic Empowerment Act no.53 of 2003 and the Preferential Procurement Policy Framework Act no.5 of 2011

3. BACKGROUND AND SCOPE OF WORK

REQUEST

This project is about the validation of the recalibration exercise performed on the ECL models, updated Pricing tools and redeveloped Commercial Development Business Banking PD Scorecards.

INTRODUCTION / CONTEXT

The ECL models were originally developed in May 2016 by a Consulting company using 2011 to 2015 data to build the model, generally recalibration of the model happens at least once a year, the current ECL model was last recalibrated in 2021 with latest data. The annual recalibration is due and once completed by the model development team will require validation to be conducted before implementation. This is a critical part of the process that auditors will check before they run their challenger model to calculate the ECL provision which they then compare to Land Bank's calculated ECL for reasonability.

Furthermore, as part of these models the Commercial Development Business Banking PD Scorecards was no longer ranking risk as determined from the previous recalibration work and had to be redeveloped.

The Pricing tools (Commercial/Development/Corporate) have undergone validation and key observation were made which necessitated enhancement to be made based on validation recommendation. Once the enhancements are completed the bank will be required to validate the updated Pricing tools before deployment in the credit value chain.

The project is planned to take 4 weeks and submission should provide pricing per model.

SCOPE OF WORK

Validation of the ECL model Recalibration

The validation of the ECL model will be performed as how the models are currently implemented and scope includes the following:

- i) Validation of the recalibrated models for different segmentations which follows same methodology and its impact to the ECL model
 - a. PD models (PD at 12 months, PD Seasonality, PD Macro Model, PD Transition Model)
 - b. Behavioural life model
 - c. LGD model
 - d. EAD model for different segmentation
- ii) The documentation of the approach used during the validation of the models.
- iii) The documentation of the full validation reports (i.e. includes findings, results and recommendations) of above-mentioned models including the SAS code that was used to validate the models.
- iv) Full meeting to discuss the final validation reports.

Validation of the Pricing tools

The validation work will include the following:

- i) Validation of the updated Pricing tools (Commercial/Development/Corporate) and testing the following:
 - a. The re-performance of the final pricing using RAROC target and few level of RAROC targets below to assess its impact on OPEX and pricing.
 - b. The assessment of the parameters used in the model to verify its application and appropriateness as per pricing model document and policy.
 - c. To assess the level of alignment of the pricing tool with the bank's Corporate Plan and Risk Appetite indicators.
 - d. To assess the optimization method applied in the excel VBA code if it considers business constraints or relevant Land Banks' risk appetite indicators when adjusting the loan price to achieve the RAROC target.
- ii) The documentation of the approach used during the validation of the models.
- iii) The documentation of the full validation report (i.e. includes findings, results and any recommendations).
- iv) Full meeting to discuss the final validation reports.

Validation of the Redeveloped Commercial Development Business Banking PD Scorecards

The validation work will include the following:

- i) Validation of the Redeveloped Commercial Development Business Banking PD Scorecards (commercial/development).
- ii) The documentation of the approach used during the validation of the models.
- iii) The documentation of the full validation report (i.e. includes findings, results and any recommendations).
- iv) Full meeting to discuss the final validation reports.

PEPS

Politically exposed person or PEP is the term used for an individual who is or has in the past been entrusted with prominent public functions in a particular country. The principles issued by the Wolfsberg Group of leading international financial institutions give an indication of best banking practice guidance on these issues. These principles are applicable to both domestic and international PEPs.

The following examples serve as aids in defining PEPs:

- Heads of State, Heads of Government and cabinet ministers;
- influential functionaries in nationalised industries and government administration;
- senior judges;
- senior political party functionaries;
- senior and/or influential officials, functionaries and military leaders and people with similar functions in international or supranational organisations;
- members of ruling or royal families;
- senior and/or influential representatives of religious organisations (if these functions are connected to political, judicial, military or administrative responsibilities).

According to the Wolfsberg principles, families and closely associated persons of PEPs should also be given special attention by a bank. The term "families" includes close family members such as spouses, children, parents and siblings and may also include other blood relatives and relatives by marriage. The category of "closely associated persons" includes close business colleagues and personal advisers/consultants to the PEP as well as persons, who obviously benefit significantly from being close to such a person.

A bank should conduct proper due diligence on both a PEP and the persons acting on his or her behalf. Similarly, KYC principles should be applied without exception to PEPs, families of PEPs and closely associated persons to the PEP.

Any one of the following documents reflecting the physical/business address is acceptable

CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
 - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
 - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
- 4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
