## CONTROLLED DISCLOSURE

When downloaded from the EDMS, this document is uncontrolled and the responsibility rests with the user to ensure it is in line with the authorised version on the system

## **1. INTRODUCTION**

Kendal Power Station Ductings are used to deliver air to the boiler for combustion and to exhaust combustion gases from the boiler to the ash handing system. Overtime the ductings are eroded by the fly ash flowing through and the integrity of the ducting walls and floors is compromised by holes and thinned out material. This material needs to be reinstated to ensure generating assurance.

## **2. SUPPORTING CLAUSES**

### **2.1 SCOPE**

This document refers to the Supplier Technical Evaluation for the contract to repair the ductings for Kendal Power station. The strategy lists different aspects that will be evaluated and scored by the multi-disciplinary Technical Evaluation Team (TET) to complete the technical evaluation of the enquiry. The team members are listed and appointed in this document along with their responsibilities. The document also describes the acceptable and unacceptable risks and qualifications and/or conditions.

The Technical Evaluation Strategy will define the following technical evaluation criteria:

- Mandatory Evaluation Criteria
- Qualitative Evaluation Criteria
- TET Member Responsibilities
- Acceptable / Unacceptable Qualifications

Once the Technical Evaluation Strategy is finalised and authorised for issue to market, no changes will be made to the evaluation criteria.

#### **2.1.1 Purpose**

The purpose of this tender technical evaluation strategy is to define the Mandatory Evaluation Criteria, Qualitative Evaluation Criteria and TET member responsibilities for tender technical evaluation. The technical evaluation strategy serves as basis for the tender technical evaluation process.

#### **2.1.2 Applicability**

This document applies to the procurement of a service provider for the Refurbishment and repair of the ductings at Kendal power station.

This Technical Evaluation Strategy is applicable to the evaluation of service providers who are fabricators/Repairers of ductings for Coal Fired power stations.

## **2.2 NORMATIVE/INFORMATIVE REFERENCES**

Parties using this document shall apply the most recent edition of the documents listed in the following paragraphs:

### **2.2.1 Normative**

- [1] 240-48929482 Tender Technical Evaluation Procedure
- [2] 32-1034 Eskom Procurement and supply chain management procedure

### **CONTROLLED DISCLOSURE**

## 2.3 DEFINITIONS

| SCORE | PERCENTAGE | DESCRIPTION  |
|-------|------------|--|
| 5     | 100%       | Exceeds Power stations Requirements demonstrates exceptional and technical ability, no errors, weaknesses or omissions   |
| 4     | 85%        | Meets Power stations Requirements no errors, risks, weaknesses or omissions  |
| 3     | 70%        | Marginally does not meet Power Stations Requirements some minor errors, risks, weaknesses or omissions which can be corrected or overcome with negotiation and minor cost impact |
| 2     | 35%        | Substantially does not meet Power Stations Requirements many errors, risks, weaknesses which may be difficult to be correct or overcome and make acceptable                      |
| 1     | 0%         | No achievement of Power stations Requirements existence of numerous errors, risks, weaknesses or omissions which cannot be corrected   |
| 0     | 0%         | Totally deficient / non-responsive*  |

### 2.3.1 Classification

**Controlled Disclosure:** Controlled Disclosure to external parties (either enforced by law, or discretionary)

## 2.4 ABBREVIATIONS

| Abbreviation | Description                        |

| TET          | Technical Evaluation Team          |
| OEM          | Original Equipment Manufacturer    |
| AEM          | Alternative Equipment manufacturer |
| C&I          | Control and Instrumentation        |

### CONTROLLED DISCLOSURE

When downloaded from the EDMS, this document is uncontrolled and the responsibility rests with the user to ensure it is in line with the authorised version on the system

## 2.5 ROLES AND RESPONSIBILITIES

As per 240-48929482 Tender Technical Evaluation Procedure

## 2.6 PROCESS FOR MONITORING

N/A

## 2.7 RELATED/SUPPORTING DOCUMENTS

N/A

## 3. TENDER TECHNICAL EVALUATION STRATEGY

### 3.1 TECHNICAL EVALUATION THRESHOLD

The minimum weighted final score (threshold) required for a tender to be considered from a technical perspective is 80%

### 3.2 TET MEMBERS

Table 1: TET Members

| TET number | TET Member Name              | Designation        |
|------------|------------------------------|--------------------|
| TET 1      | Jesse Eganza                 | Snr Engineer       |
| TET2       | Tendani Rasivhetshela Pr Eng | Boiler Eng Manager |
| TET3       | Jacob Zwane                  | Snr Engineer       |
| TET4       | Thengi Molotsi               | System Engineer    |

#### CONTROLLED DISCLOSURE

| 4 2                         | X     | X     | X     | X     |

### 3.6 FORESEEN ACCEPTABLE / UNACCEPTABLE QUALIFICATIONS

#### 3.6.1 Risks

**Table 5: Acceptable Technical Risks**

| Risk | Description  |
|------|--|
| 1    | The contractor is experienced in complex steel fabrication |

**Table 6: Unacceptable Technical Risks**

| Risk | Description  |
|------|--|
| 1    | Contractor has no experience with ducting refurbishment/repair |

#### 3.6.2 Exceptions / Conditions

**Table 7: Acceptable Technical Exceptions / Conditions**

| Risk | Description |
|------|-------------|
| 1    | None        |

**Table 8: Unacceptable Technical Exceptions / Conditions**

| Risk | Description                               |
|------|---|
| 1    | The tenderer has no welding accreditation |
| 2    | The tenderer has no Skills                |

#### 4. AUTHORISATION
