

Appendix A - Medupi Environmental Policy Statement

Medupi Power Station Project Environmental Policy Statement

Medupi Power Station Project is a construction site for a coal-fired power station with six units generating a total capacity of 4800MW of electricity. The primary environmental issues arising from the business are the use of natural resources, potential impacts on biodiversity, the generation of waste, effluent and emissions to the atmosphere. The scope of this environmental Policy covers the Project management, Construction management and Commissioning of the Medupi Power Station by the Medupi Project Team.

Medupi Power Station Project recognizes that our activities, services and products have or may have impacts on the environment. We are committed to minimizing these impacts through implementing sound environmental practices and maintaining an effective Environmental Management System certified in terms of the ISO14001:2015 Standard which will contribute toward sustainable development.

We commit ourselves to:

- Complying with applicable local, provincial, national, and international environmental legislation;
- Complying with other requirements to which our organisation subscribes to such as Eskom policies, standards, directives and procedures, as well as the Lenders Requirements;
- Continual improvement of our Environmental Management System;
- Protection of Environment. Including prevention of pollution and reduction of impacts where possible;
- Using this Policy as a framework for setting Objectives and Targets;
- Maintaining awareness of environmental issues in our workplace, as well as with the public and at local relevant environmental and community forums;
- Identify and monitor the needs and expectations of interested parties that are relevant to the Project's Environmental Management System;
- Sound air, water, waste, land and biodiversity management.
- Managing, investigating and where possible remedying all significant environmental aspects and impacts;
- Implementing and maintaining an ISO 14001:2015 Environmental Management System;
- Communicating environmental issues where applicable to persons working for or on behalf of our Project;
- Ensuring this policy available to interested parties upon request, and;
- Reviewing this policy regularly in line with the document control, operational and other requirements.
