SECTION 3: BACKGROUND, OVERVIEW AND SCOPE OF REQUIREMENTS

1 BACKGROUND

Transnet SOC Ltd is South Africa's integrated rail, port, and pipeline company and the backbone of the national freight logistics system. It plays a pivotal role in moving goods efficiently from producers to consumers, thereby supporting trade, industrial development, and economic growth.

However, Transnet is at an inflection point. Its performance in freight logistics and supply chain competitiveness has been lagging, and a constrained financial position has curtailed much-needed investment. This has further weakened the system, increased the risk of operational failures, and placed the security and reliability of supply under pressure.

To address these challenges, Transnet has adopted the Reinvent for Growth Strategy, structured around three interdependent focus areas:

- **Fix and Optimise the Business** – tactical, operationally driven initiatives to stabilise performance, protect existing revenues, improve efficiency, and reduce costs.
- **Transform the Business** – structural reforms, including fundamental changes to operating models (notably rail reform), to enable a step-change in performance and competitiveness.
- **Grow the Business** – expansionary initiatives that build on improved operations and strategic repositioning to capture new opportunities, expand market share, and leverage Transnet's natural and acquired advantages.

Together, these priorities represent a shift from short-term stabilisation to long-term transformation and growth. They also provide the platform for flagship programmes in:

- **Rail Reform** - renewed investment and rejuvenation of the rail sector, establishment of an independent Infrastructure Manager with a regulated asset base, and enabling fair access for private Train Operating Companies (TOCs).
- **Port Reform** - strengthening the independence of the National Ports Authority and introducing greater competition within port terminals to improve efficiency and service quality.
- **Segment Strategies** - unlocking growth and competitiveness across nine (9) key market segments.

At the same time, the broader freight logistics system is undergoing structural reform under national policy imperatives. The National Rail Policy, Freight Logistics Roadmap (FLR), PSP Framework, and the Economic Regulation of Transport Act collectively aim to create an open, efficient, and commercially sustainable logistics system, underpinned by private sector investment and participation.

In December 2023, Cabinet approved both the FLR and the DoT PSP Framework. The FLR sets out a roadmap to address immediate logistics challenges while laying the foundation for medium- to long-term reforms, balancing short-term "quick wins" with structural change. The PSP Framework complements this by establishing

the institutional and governance arrangements required to mobilise private sector investment and to provide consistent, transparent processes for structuring and delivering PSP transactions.

Central to this reform agenda is addressing the inefficiencies in freight rail and ports that remain a severe constraint on exports, economic growth, and job creation. Immediate stabilisation efforts are being implemented through five (5) priority freight corridors, fully aligned with the Transnet Board-approved Recovery Plan. However, these short-term measures must be complemented by structural reforms to secure sustainable, long-term change.

In this context, the Department of Transport has launched a Request for Information (RFI) process as part of the broader PSP programme. The RFIs serve as a market-sounding exercise, engaging investors, operators, and financiers to validate demand, test appetite, and frame the problem statements that will guide the design of PSP transactions. Insights from the RFIs will be incorporated into the project preparation phase of future PSPs, ensuring that transaction structures are aligned with market realities and national policy objectives.

Transnet is actively engaged in this process and, in parallel, is preparing five priority PSP transactions across rail and port assets. While these are critical to long-term transformation, the structuring, procurement, and financial close of PSP projects typically take 18 to– 48 months, creating an interim capacity and investment gap. Bridging this gap will require Transnet to mobilise specialist external expertise to sustain momentum and ensure that PSP-led solutions are executed with the speed, rigour, and quality required to deliver on South Africa's logistics reform agenda.

PANEL UTILISATION

Once appointed, the Transaction Advisory Panel will be mobilised on a rotational task order basis via RFQs/RFPs, ensuring both fair distribution of work and the deployment of the most suitably qualified advisors for each assignment. Transnet will oversee task order allocation to maintain transparency, competitiveness, and alignment with project requirements.

In awarding assignments, Transnet will also consider the level of specialisation and experience across modalities (rail, ports, pipelines, property, and telecoms) to ensure optimal alignment between project needs and advisory expertise. This approach balances fairness with the need to secure best-in-class outcomes for Transnet's priority projects.

Transnet reserves the right to appoint single or multiple firms to any task order, depending on project needs.

2 EXECUTIVE OVERVIEW

Transnet seeks to appoint a competent and experienced a Service Providers for the establishment of a Transaction Advisory frame, it also seeks to improve is current processes whereby providing these services to its end user community throughout its locations.

In this spirit of partnership, Transnet and its Service provider(s) will study the current ways they do business to enhance current practices and support processes and systems. THE NATIONAL INDUSTRIAL PARTICIPATION PROGRAMME**INTRODUCTION**

The National Industrial Participation Programme (NIPP), which is applicable to all government procurement contracts that have an imported content, became effective on the 1 September 1996. The NIP policy and guidelines were fully endorsed by Cabinet on 30 April 1997. In terms of the Cabinet decision, all state and parastatal purchases / lease contracts (for goods, works and services) entered into after this date, are subject to the NIPP requirements. NIPP is obligatory and therefore must be complied with. The Industrial Participation Secretariat (IPS) of the Department of Trade and Industry (DTI) is charged with the responsibility of administering the programme.

1. PILLARS OF THE PROGRAMME

- 1.1 The NIPP obligation is benchmarked on the imported content of the contract. Any contract having an imported content equal to or exceeding US\$5 million or other currency equivalent to US\$5 million will have a NIP obligation. This threshold of US\$5 million can be reached as follows:
- (a) Any single contract with imported content exceeding US\$5 million.

or

 - (b) Multiple contracts for the same goods, works or services each with imported content exceeding US\$3 million awarded to one seller over a 2 year period which in total exceeds US\$5 million.

or

 - (c) A contract with a renewable option clause, where should the option be exercised the total value of the imported content will exceed US\$5 million.

or

 - (d) Multiple suppliers of the same goods, works or services under the same contract, where the value of the imported content of each allocation is equal to or exceeds US\$ 3 million worth of goods, works or services to the same government institution, which in total over a two (2) year period exceeds US\$5 million.
- 1.2 The NIP obligation applicable to suppliers in respect of sub-paragraphs 1.1 (a) to 1.1 (c) above will amount to 30% of the imported content whilst suppliers in respect of paragraph 1.1 (d) shall incur 30% of the total NIPP obligation on a *pro-rata* basis.
- 1.3 To satisfy the NIPP obligation, the DTI would negotiate and conclude agreements such as investments, joint ventures, sub-contracting, licensee production, export promotion, sourcing arrangements and research and development (R&D) with partners or suppliers.
- 1.4 A period of seven years has been identified as the time frame within which to discharge the obligation.
