BID NAME

ADVERTISEMENT: APPOINTMENT OF A SERVICE PROVIDER FOR THE SUPPLY AND DELIVERY OF THERMAL PRINTER, DUMB TERMINAL AND TAG READERS (DUAL FREQUENCY PROGRAMMABLE) TO THE TSHWANE MARKET ON AS AND WHEN REQUIRED BASIS: 12-MONTH PERIOD

**BID NUMBER
Q82-2025-26**

1. BACKGROUND

The Tshwane Fresh Produce Market operates a mission-critical, real-time Market Trading System which is central to the daily operations and functioning of the market. This system supports the trading activities of producers, agents, buyers, and market management, and handles all sales transactions, clearances, payments, pay-outs, reports, and statistical processing.

The Market's trading hours are from 05:00 to 10:30 daily, during which an average of 13,636 sales transactions are processed, translating to a daily turnover of approximately R13 million. Given the high transaction volumes and time-sensitive nature of operations, the system infrastructure and its associated hardware components must offer maximum reliability, speed, and efficiency.

The existing application software is a comprehensive, modular Fresh Produce Market and Agency Management System. It comprises over 2,200 programs and procedures and updates more than 250 database files and tables. The system is tightly integrated with specific hardware components, namely thermal printers, dual-frequency programmable magnetic tag readers, and dumb terminals, which are essential for efficient market operations.

Magnetic Tag Readers

To initiate a purchase, agents must have a properly working magnetic tag reader. Once a sale agreement is reached between a buyer and agent, the buyer's tag is swiped using a dual-frequency programmable magnetic tag reader, which triggers the system to process the sale in real time.

These magnetic tag readers are a critical part of the sales infrastructure and must be:

- Durable and of high quality
- Capable of continuous operation during trading hours
- Fully compatible with the existing Market Trading System
- Capable of reading both low-frequency and high-frequency magnetic tags

Thermal printers are used for:

- Generating real-time receipts
- Printing sales confirmations
- Producing daily reports and transaction summaries for buyers and agent

Dumb Terminals are used for:

Dumb terminals are used by agents and Market staff to interface with the trading system. These terminals must be:

- Robust and reliable
- Fully compatible with the existing Market Trading System
- Capable of operating continuously during market hours without performance degradation

A reliable and uninterrupted supply of these devices is essential to maintain service delivery and ensure smooth daily operations for all market stakeholders.

CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Municipal Bidding Document (MBD) must form part of all bids¹ invited.

- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.

- 3 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
 - a. take all reasonable steps to prevent such abuse;
 - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
 - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.

- 4 This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

- 5 In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
