1. PURPOSE

- 1.1. To appoint a service provider to provide specialist technical, legal, financial, and economic modelling and stakeholder advisory services to the Regulating Committee for Meteorological Services (RCMS) in regulating fees payable to the South African Weather Service (SAWS) for the provision of meteorological services to the aviation and maritime industries for a period of three (3) years.

2. INTRODUCTION AND BACKGROUND

- 2.1 In terms of Section 4(2)(e) of the South African Weather Service Act, 2001 (Act No.8 of 2001) (SAWS Act), the SAWS may, to achieve its objectives, charge fees for the provision of any commercial services. Section 28 (b) of the SAWS Act empowers the Minister to make regulations regarding fees for the provision of aviation and maritime meteorological services after consultation with the SAWS Board and other stakeholders.
- 2.2 Section 21(1) of the SAWS Act provides that the function of the RCMS is to review all tariff proposals for accuracy, affordability and sustainability. The RCMS has supported the Minister in promulgating aviation tariffs since 29 November 2002 (Government Gazette No. 24128, Notice No. 1505). In reviewing these tariffs, the RCMS requires specialist assistance as and when a need arise to engage with the aviation industry stakeholders to address pertinent issues relating to the fairness of the tariffs. It has thus become the norm to review the tariffs annually to make adjustments for any over or under-recovery that may have occurred.

3. OBJECTIVES

- 3.1. The objective is to appoint a suitable service provider who has a good understanding and proven track record in the following:
 - 3.1.1. Financial and economic analysis and modelling.
 - 3.1.2. Modelling and assessment of meteorological services cost allocated to aviation and maritime industries.
 - 3.1.3. The cost drivers for meteorological services.
 - 3.1.4. International and national legislative background on meteorological usage by aviation and maritime sectors including frameworks on aviation and maritime meteorological services as set out by the World Meteorological Organization (WMO) and International Civil Aviation Organization (ICAO) and
 - 3.1.5. Tariff Development and or Regulation.

4. SCOPE AND EXTENT OF WORK

- 4.1. The service provider will render specialist technical, legal, financial, and economic advisory services and support to the DFFE during the development of aviation/maritime meteorological tariffs.
- 4.2. The role of the service provider is to assist the DFFE in reviewing and verifying the SAWS aviation/maritime meteorological tariffs proposal and the basis thereof and proposing new tariffs to the RCMS for consideration and subsequent recommendation to the Minister for promulgation.
- 4.3. The review of aviation meteorological service tariffs follows a similar pattern each year and the process is informed by the International Civil Aviation Organization (ICAO) recommendations.
- 4.4. The service provider will be required to keep track of trends in the performance of the aviation industry every month and continuously advise the RCMS on possible impact on aviation tariffs as well as reporting potential risks to cost recovery. In doing so, the service provider will collect monthly air traffic data from Air Traffic Navigation Services (ATNS), model the data, continuously issue air traffic projections for the remainder of the financial year and submit monthly aviation meteorological tariff performance report to the DFFE detailing actual performance against projections in terms of cost recovery and total service units (TSUs) and associated impact and risks.
- 4.5. The service provider will review SAWS annual financial statements, revenue requirements, aviation meteorological tariff proposal and compile an assessment report to submit to the DFFE for consideration within seven (7) working days after receipt of documents. The service provider will be required to undertake the following activities as part of the review:
 - Use internationally acceptable methodology to ascertain the basis for the aviation meteorological tariffs proposed by SAWS.
 - Assess input parameters used in the SAWS Demand Model, Capital Investment Plan, and Financial Model for reliability and accuracy.
 - Use credible and independent models for logic and accuracy checks of the SAWS proposal and
 - Verification of tariffs using independent data.
- 4.6. The aviation industry will be given an opportunity to submit written comments on SAWS aviation meteorological tariffs proposal to the DFFE within ten (10) working days after receipt. The service provider will be required to assess representations from aviation industry stakeholders about SAWS tariffs proposal and submit an assessment report to the DFFE on the technical basis of the representations and or the aviation industry's counter proposal.
- 4.7. The service provider will conduct further research on the potential impacts of tariffs as per the submission from stakeholders and undertake an independent economic modelling and impact assessment to inform proposed aviation meteorological tariffs and submit report to the DFFE within set timeframes in line with the RCMS annual tariff review cycle.

- 4.8. The service provider will compile a comprehensive technical report detailing the process followed to determine RCMS-based tariff proposals and recommendations for every annual tariff review cycle to be accompanied by a presentation and submit to the DFFE within set timeframes in line with the RCMS annual tariff review cycle.
- 4.9. The service provider will support the DFFE with the publication of a Notice of Intent on proposed aviation meteorological tariffs i.e. Draft Regulations in the gazette and national newspaper to invite public comments and subsequent promulgation of final aviation meteorological tariffs for implementation i.e. Regulations regarding fees for the provision of aviation meteorological services.
- 4.10. The service provider will review all public and stakeholders' comments on proposed aviation meteorological tariffs and submit assessment report to the DFFE within set timeframes in line with the RCMS annual tariff review cycle.
- 4.11. From time to time, the service provider will be required to provide ad-hoc support to the DFFE, which will include participation in consultations and engagement meetings with stakeholders, attending briefing sessions and workshops/conferences, preparing ad-hoc reports/presentations, providing training, conducting site visits, and processing other requests from the DFFE as and when required.

 - Conduct training and preparation of training material and/ or other ad hoc reports/presentations as and when required based on the needs as determined by the DFFE.
 - Conduct site visits in support of the DFFE and/ or attend workshops/conferences as and when required.
 - Compile a draft annual Close-Out report for each aviation tariff review cycle within 30 days after the final promulgation of aviation tariffs and submit it to the DFFE for consideration. Aviation tariffs must be promulgated by 31 March for implementation effective 1 April every year. This report must be submitted to the DFFE latest by 30th April annually and

- Compile end of contract Close-Out/Hand-Over report and submit to the DFFE one month prior to the last day of the contract.
- 4.13 The service provider will conduct thorough review of draft Maritime Feasibility Study report, identify and address gaps in the report.
- 4.14 The service provider will support the DFFE in conducting consultations with SAWS and maritime industry stakeholders as part of the review and finalization of the draft Maritime Feasibility Study report.
- 4.15 The service provider will update draft Maritime Feasibility Study report, provide recommendations on the feasibility of maritime meteorological tariffs and submit final report to the DFFE within six (6) months after the DFFE has confirmed in writing to the service provider to commence with the work in this regard.
