INTRODUCTION

SANParks hereby invites professional and competent service providers to submit proposals for the appointment of a service provider to supply and deliver pool acid and swimchlor as and when required for a period of five (5) years at Kruger National Park.

PROJECT BACKGROUND

The Kruger National Park (KNP) is one of South Africa's largest and most visited national parks, accommodating millions of local and international visitors annually. As part of its mandate to provide safe, functional, and well-maintained facilities, the Park operates multiple swimming pools across various rest camps, staff villages, and visitor facilities. These swimming pools require consistent upkeep to ensure compliance with health, hygiene, and safety standards prescribed for public recreational water facilities.

To maintain optimal water quality, the regular use of chemical agents such as pool acid (hydrochloric acid) for pH regulation and swimchlor (stabilised chlorine) for disinfection is essential. These chemicals prevent the growth of harmful microorganisms, maintain clarity, and ensure that pool water remains safe for public use. Due to the high volume of visitors and the vast geographical spread of facilities within the Park, the demand for these chemicals is continuous and varies throughout the year.

The South African National Parks (SANParks) therefore requires the appointment of a competent and reliable service provider to supply and deliver pool acid and swimchlor on an as-and-when-required basis for a period of five (5) years.
