## 1. Background

Sekhukhune District Municipality (SDM) was established in December 2000 and is situated within the south of Limpopo Province, about 300 Kilometers north of Johannesburg. It is bordered by Gauteng Province to the south, Mpumalanga Province to the east as well as Waterberg towards the west. Sekhukhune is relatively accessible with the use of its relatively extensive road network system. It is characterized by a scattered pattern of human settlement and contains a large number of rural villages 764<sup>1</sup> which lack both economic infrastructure and opportunities and services of a reasonable standard. Overall, it covers approximately 13 264 kilometers with only 5% of the district's population estimated to live in urban areas.

SDM consists of four local municipalities namely: Fetakgomo Tubatse, Elias Motsoaledi, Makhuduthamaga and Ephraim Mogale. There are 121 wards in the district. The total population of the district is estimated at 1 169 762<sup>2</sup>. Groblersdal, Marble Hall, Burgersfort, Jane Furse, Ohrigstad, Steelpoort and Driekop constitute the main urban centres.

Sekhukhune District cuts across the north-eastern part of the Bushveld Complex, an immense geological structure that contains the largest reserves of platinum group metals (PGM) in the world. The district has 22 operating mines and a number of prospecting projects/mines. The major mining activity in the district occurs within the Dilokong Corridor, which stretches largely across Tubatse and Fetakgomo. Mining contribution to Sekhukhune Gross Geographic Product is estimated at between 15-20%<sup>3</sup>.

Besides mining, the district is endowed with good soils and climatic conditions for farming. The town of Groblersdal in Elias Motsoaledi Local Municipality, and Marble Hall in the Ephraim Mogale Local Municipality, are found in what is referred to as the Loskop Valley. The large commercial agricultural schemes in the valley are serviced by the Loskop Dam, built in 1938 especially for this purpose. The area has large commercial agricultural estates which should participate in empowering SMME's and Cooperatives. The district also has retail and industry sector and tourism potential.

Manufacturing is a relatively small sector within the Sekhukhune economy. The most common manufacturing activities include the making of sand bricks, windows, doors and steel frames. These activities respond to local demand from the infrastructural development associated with housing projects, roads rehabilitation, as well as agriculture and mining activities. There is potential for growth in manufacturing through the effective links created to exploit opportunities resulting from the mining and public sector infrastructure spending.

### Challenges

2011 Statistics showed that unemployment rate and average household income in the district stood at 51.6% and R45 977.00 respectively for those who are employed<sup>4</sup>. The above figures paint a dire situation non

indicative of the amount of wealth the district is endowed with in terms of agriculture and mineral resources. There is a need to aggressively add value to the raw materials the district is producing. Currently the raw materials are exported to the outside world. Industrialisation can assist to correct the current situation.

## 2. Purpose

It is against the above background that Sekhukhune District Municipality is seeking to appoint an experienced **Professional Service Provider** to develop **District Regional Industrial Development Master Plan**. The purpose of the Master plan is to articulate a district wide framework that will assist in coordinating, orientating, and guiding all industrial development programmes and related activities in Sekhukhune District/Region. The key tasks for the preparation of the Master Plan include determining:

- How the plan design should be developed considering survey information, a review of previous and ongoing studies, committed locators/partners, and phasing of development.
- What growth planning assumptions would be needed to drive the planned land mix and use (i.e. residential, industrial, commercial, etc.), and, whether they seem reasonable in light of the current market.

Expected outputs from the Master Plan would include:

- Which roads should be built first and why, and the parameters (detailed design) of the roads.
- what topography, waterways, drainage, and other natural features of the site/s need to be preserved.
- What are the civil infrastructure considerations based on the water supply and waste treatment, electricity, communication, projected growth, the overall development strategy, and their phasing.
- Where the major infrastructure would be located, and how the networks of collection and distribution might be routed, according to road and rail layouts and topography.
- Whether or not the development passes a preliminary feasibility test.

### CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Municipal Bidding Document (MBD) must form part of all bids<sup>1</sup> invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).<sup>2</sup> Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
  - a. take all reasonable steps to prevent such abuse;
  - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
  - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
- 4 This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

<sup>1</sup> Includes price quotations, advertised competitive bids, limited bids and proposals.

<sup>2</sup> Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
