<b>PART C2: PRICING DATA .....</b>	<b>68</b>
<b>C2.1 PRICING INSTRUCTIONS .....</b>	<b>68</b>
<b>C2.2 SCHEDULE OF QUANTITIES .....</b>	<b>71</b>

## PART C2: Pricing Data

### C2.1 PRICING INSTRUCTIONS

- 1 The Conditions of Contract, the Contract Data, the Specifications (including the Project Specifications) and the Drawings shall be read in conjunction with the Bill of Quantities.
- 2 The Bill comprises items covering the Contractor's profit and costs of general liabilities and of the construction of Temporary and Permanent Works.

Although the Bidder is at liberty to insert a rate of his own choosing for each item in the Bill, he should note the fact that the Contractor is entitled, under various circumstances, to payment for additional work carried out and that the Project Manager is obliged to base his assessment of the rates to be paid for such additional work on the rates the Contractor inserted in the Bill. Clause 8 of each Standardized Specification, and the measurement and payment clause of each Particular Specification, read together with the relevant clauses of the Project Specifications, all set out which ancillary or associated activities are included in the rates for the specified operations

- 3 Descriptions in the Bill of Quantities are abbreviated and may differ from those in the Standardized and Project Specifications. No consideration will be given to any claim by the Contractor submitted on such a basis. The Bill has been drawn up generally in accordance with the latest issue of Electrical Engineering Quantities. Should any requirement of the measurement and payment clause of the appropriate Standardized or Project Specification(s) be contrary to the terms of the Bill or, when relevant, to the Electrical Engineering Quantities, the requirement of the appropriate Standardized, Project, or Particular Specification as the case may be, shall prevail
- 4 Unless stated to the contrary, items are measured net in accordance with the Drawings without any allowance having been made for waste. The final design drawings and accompanying construction bill of quantities provided by the contractor and design engineer, will be approved by the assigned MISA project manager and will be required to facilitate implementation of the C.2.2 Schedule of quantities.
- 5 The amounts and rates to be inserted in the Bill of Quantities shall be the full inclusive amounts to the Employer for the work described under the project specifications. Such amounts shall cover all the costs and expenses that may be required in and for the construction of the work described, and shall cover the costs of all general risks, profits, taxes (but excluding value-added tax), liabilities and obligations set forth or implied in the documents on which the Tender is based.
- 6 An amount or rate shall be entered against each item in the Bill of Quantities, whether or not quantities are stated. An item against which no amount or rate is entered will be considered to be covered by the other amounts or rates in the Bill.

The Bidder shall also fill in a rate against the items where the words "rate only" appear in the amount column. Although no work is foreseen under these items and no quantities are consequently given in the quantity column, the tendered rates shall apply should work under these items actually be required.

Should the Bidder group a number of items together and tender one sum for such group of items, the single tendered sum shall apply to that group of items and not to each individual item, or should he indicate against any item that full compensation for such item has been included in another item, the rate for the item included in another item shall be deemed to be nil.

The tendered rates, prices and sums shall, subject only to the provisions of the Conditions of Contract, remain valid irrespective of any change in the quantities during the execution of the Contract.

- 7 The quantities of work as measured and accepted and certified for payment in accordance with the Conditions of Contract, and not the quantities stated in the Bill of Quantities, will be used to determine payments to the Contractor. The validity of the Contract shall in no way be affected by differences between the quantities in the Bill of Quantities and the quantities certified for payment.

**Ordering of materials** are not to be based on the Bill of Quantities, but only on information issued for construction purposes.

- 8 Provisional Sums in the schedule of quantities shall be utilised at the discretion of the Project Manager. In addition, provisional sums may be omitted entirely by the Project Manager if so required.
- 9 Those parts of the works to be constructed using labour-intensive methods **have been marked in the schedule of quantities with the letters LI in a separate column** filled in against every item so designated. The works, or parts of the works so designated are to be constructed using labour-intensive methods only. The use of plant to provide such works, other than plant specifically provided for in the scope of work, is a variation to the contract. The items marked with the letters LI are not necessarily an exhaustive list of all the activities which must be done by hand, and this clause does not over-ride any of the requirements in the generic labour intensive specification in the Scope of Works.
- 10 Where minimum labour intensity is specified by the design the contractor is expected to use his/her initiative to identify additional activities that can be done labour intensively in order to comply with the set minimum labour intensity target.
- 11 . Payment for items which are designated to be constructed labour-intensively (either in this schedule or in the Scope of Works) will not be made unless they are constructed using labour-intensive methods. Any unauthorised use of plant to carry out work which was to be done labour-intensively will not be condoned and any works so constructed will not be certified for payment.
- 12 For the purposes of this Bill of Quantities, the following words shall have the meanings hereby assigned to them:

**Unit** : The unit of measurement for each item of work as defined in the Standardized, Project or Particular Specifications

**Quantity** : The number of units of work for each item

- Rate** : The payment per unit of work at which the Bidder tenders to do the work
- Amount** : The quantity of an item multiplied by the tendered rate of the (same) item
- Sum** : An amount tendered for an item, the extent of which is described in the Bill of Quantities, the Specifications or elsewhere, but of which the quantity of work is not measured in units

- 13 The units of measurement indicated in the Bill of Quantities are metric units. The following abbreviations may appear in the Bill of Quantities:

mm	=	millimetre
m	=	metre
km	=	kilometre
km-pass	=	kilometre-pass
m <sup>2</sup>	=	square metre
m <sup>2</sup> -pass	=	square metre-pass

m <sup>3</sup>	=	cubic metre
m <sup>3</sup> -km	=	cubic metre-kilometre
kW	=	kilowatt
kN	=	kilonewton
kg	=	kilogram
t	=	ton (1 000 kg)

MN	=	meganewton
MN-m	=	meganewton-metre
Sum	=	Sum

Prov Sum	=	Provisional Sum

## C2.2 SCHEDULE OF QUANTITIES

All items in the Bill of Quantities include all the resources, materials, tools and equipment as well as labour required to execute the work to completion.

Where the Scope of Work requires detailed drawings and designs from the Contractor or other information to be provided, all costs associated therewith are deemed to have been provided for and included in the unit rates and sum amounts tendered under such items.

**The final design drawings and accompanying construction bill of quantities provided by the contractor and design engineer, will be approved by the assigned MISA project manager, and will be required to facilitate implementation of the tendered Schedule of Quantities below.**

## **C3.1 DESCRIPTION OF THE WORKS AND SERVICES**

### **1. EMPLOYERS' OBJECTIVES**

MISA's objective is to appoint a management contractor, for the refurbishment: design, supply, delivery, installation and commissioning of underground cables to allow the replacement of damaged cables to McDonalds' and Nonesi Mall to ensure restoration of power to those areas and encourage economic growth in Queenstown within the Enoch Mgijima Local Municipality.

### **2. BACKGROUND**

The Enoch Mgijima is a Category C municipality within the Chris Hani District Municipality, situated in the north-eastern part of the Eastern Cape, a linking node to all regions in the province. It is bordered by the Joe Gqabi District to the north and Amathole District to the south, OR Tambo District to the east, and Northern Cape to the west. Chris Hani is the second-largest district in the province, making up almost a third of its geographical area. The municipality comprises six local municipalities: Inxuba Yethemba, Enoch Mgijima, Intsika Yethu, Dr. A. B. Xuma, Sakhisizwe and Emalahleni.

The area, which is vastly agricultural, provides an ideal investment opportunity for agro-processing, and its proximity to the ports of East London and Port Elizabeth, with links to major routes like the N6 and N10, is an advantage. As already detailed above, the main towns include Hofmeyr, Komani (Queenstown), Molteno, Sada, Sterkstroom, Tarkastad, Whittlesea with the main economic activities as community services (52%), trade (15%), finance (14%), transport (6%), agriculture (4%), manufacturing (4%), electricity (2%).

The local municipalities of Lukhanji, Tsolwana and Ikwanca were amalgamated in 2016 to form Enoch Mgijima Local Municipality with its main offices in Komani/Queenstown. As the biggest municipality in Chris Hani District Municipality, the population is growing and more residential and commercial developments are planned in the area.

The municipality currently owes Eskom more than R900m and is struggling to manage its energy and electricity distribution business. The municipality is exceeding its Eskom registered Notified Maximum Demand. Most of the electricity infrastructure has reached its end of life and is dilapidated. Komani suffers from unending blackouts as a result of cable failures due to ageing of infrastructure, cable overloading and lack of maintenance.

During the floods in 2022, caused damage to electrical network infrastructure, the McDonald's minisub was flooded, coupled with the subsequent damage to underground cables which already had countless unsafe joints. The same cable was supplying Nonesi Mall Substation which disrupted supply to Nonesi, Mall, the refurbishment: design, supply was re-routed to Mlungisi substation which subsequently led to overloading of the Mlungisi Substation. Municipal Infrastructure Support Agent [MISA] is supporting the municipality in the refurbishment and replacement of the damaged underground cables.

MISA as a support agent to municipalities will meet its objectives of improving service delivery by allowing the municipality to understand its infrastructure the status, design requirements and constraints, network refurbishment and upgrade thereby ensuring an uninterrupted power supply to its customers. This is envisaged to make the municipality an attractive destination for tourism and other businesses
