## 2. Localisation

Eskom requires suppliers to purchase all their materials, products or any other services required within the borders of South Africa. The Local Content to South Africa will be 100% because Eskom do not expect any skills to be imported for these services and the industry is matured enough to possess all the skills required. It will form part subcontracting, skills development, and supplier development. Local to site will also be 100%.

## 3. Industrialisation

There is no requirement for industrialisation as all resources are sourced from within South Africa.

## 4. Skills Development

Successful supplier will be obligated to train **1** candidate for every **2 Million Rand** cumulated through task order awarded to the supplier; this obligation will be for the duration of the contract. The duration of the task order will not be linked with the supplier's obligation to train; therefore the supplier will have to ensure that the skills committed are successfully achieved by the end of the contract period. Skills candidates shall be sourced from previously disadvantage groups in South Africa. The purpose is to provide these candidates with skills and workplace experience in order to increase the opportunity for them to be employable within the industry. The supplier may develop the candidates directly, through their supply network or through the SETA accredited training providers.

Skills development candidates should be currently unemployed graduates from FET Colleges and universities and/or matriculants. The composition of the candidates shall be representative of the population demographics of South Africa. The supplier will be provided with the list of skills as per respective discipline to choose from, this will mean this supplier will train candidate with skill type that is relevant to their area of expertise.
