## **1. PURPOSE**

- 1.1. To appoint a service provider who will assist the department with the revision of emission inventory, emissions reduction target development, photochemical modelling of the baseline and emissions reduction targets scenarios for the Vaal Triangle Airshed Priority Area Second Generation Air Quality Management Plan for a period of eighteen (18) months.

## **2. INTRODUCTION AND BACKGROUND**

- 2.1. The first-generation Vaal Triangle Airshed Priority Area (VTAPA) Air Quality Management Plan (AQMP) was developed in terms of section 19 of the National Environmental Management: Air Quality Act, (Act No. 39 of 2004, herein referred to as AQA), and published in the national Gazette on 29 May 2009 (No 32263). By its publication, the plan was endorsed as legislation and a strategic direction for the implementation of air quality interventions in this priority area, as well as an essential blueprint for action to reduce emissions in the area, to fulfill the Government's Constitutional mandate to ensure an environment that is not harmful to the health and well-being of all South Africans.
- 2.2. The VTAPA AQMP was implemented. However, the review of the AQMP revealed several air pollutants remained in non-compliance with the National Ambient Air Quality Standards in the area. Subsequently, the second generation VTAPA AQMP was developed and promulgated in the government gazette No. 44945 of 06th August 2021.
- 2.3. In addition, the Department of Forestry, Fisheries and the Environment (DFFE) is in the process of finalising regulations for implementing and enforcing priority area AQMPs. The regulations aim to ensure mandatory implementation of interventions; providing mechanisms for government to monitor and evaluate the effectiveness of the plans, as well as to activate enforcement measures where non-compliance is identified. The regulations furthermore set out the requirements necessary for implementing and enforcing approved priority area AQMPs including funding arrangements, measures to facilitate compliance with such plans, penalties for any contravention of any failure to comply with such plans, and provide a mandate for regular review of such plans.
- 2.4. Functionality analysis was conducted to align the AQMPs with the proposed priority area regulations. This analysis revealed that the AQMPs are not aligned with the requirements of the priority area Regulations. It is, therefore, necessary to revise the emissions inventory, photochemical modelling, and emissions reduction target development and photochemical modelling

2.5. The outcomes of the above-mentioned process will inform the revision of the implementation plan/interventions for the second-generation VTAPA AQMP, which will be done in-house. The implementation of AQMP will be effectively enforced through regulations for implementing and enforcing priority area AQMPs.

### **3. OBJECTIVES**

3.1. The main aim of the project is to revise the emissions inventory, emissions reduction targets development, photochemical modelling and the baseline and emissions reduction targets scenarios for VTAPA AQMP.

### **4. SCOPE AND EXTENT OF WORK**

4.1. The appointed service provider is to assist the department with the revision of the emissions inventory, emissions reduction targets development, photochemical modelling of the baseline and emissions reduction targets scenarios for VTAPA AQMP.

4.2. The performance measures for the revision of emissions inventory, emissions reduction targets development, photochemical modelling of the baseline and emissions reduction targets scenarios for the VTAPA AQMP report will be closely monitored by the DFFE. The service provider's performance will be measured through the following outputs:

- 4.2.1. Project process plan/Inception report;
- 4.2.2. Emissions inventory development and ambient air quality assessment report;
- 4.2.3. Emissions reduction targets report;
- 4.2.4. Photochemical modelling of the baseline, and emission reduction targets scenarios report; and
- 4.2.5. Integrated Revised Report emissions inventory, emissions reduction targets development, photochemical modelling of the baseline, and emissions reduction targets for VTAPA AQMP.

### **5. EXPECTED DELIVERABLES / OUTCOMES**

5.1. The Service Provider must ensure that the current power interruption challenges in the country are not a hindrance to the project deliverables and the associated timelines as outlined in the terms of reference.

5.2. The service provider is expected to deliver the following:

- 5.2.1. Output A: Project process plan:
