No.	Date	Ref	Supplier Clarification Question	Eskom Response
1.	24/08/2026	Refer to NEC Contract/URS	For the activities required under Price List 4 (c) are only obtainable from Corro Coat	Tenderers are required to submit their own commercial rates for the items listed under Price List 4(c) based on their experience, market knowledge, supplier engagements, historical data, and assessment of the scope and associated risks.
2.	25/08/2026	Refer to NEC Contract	The tender does not specify the applicable labour rates. Bidder requests confirmation whether the labour rates are to be based on the MEIBC or BCEA?	Labour rates are only applicable in the limited circumstances defined in the Pricing Data. Tenderers are responsible for determining and pricing labour in compliance with all applicable South African labour legislation and any applicable bargaining council requirements. Tenderers shall make their own provision for labour costs within their tendered rates. Labour rates are only applicable where specifically provided for in the Pricing Data
3.	25.08.2026	Refer to NEC Contract	The Pricing Schedule includes approximately thirty-five (35) coating systems. Bidder requests confirmation of the three (3) coating systems most frequently utilized at Koeberg.	Historical utilisation indicates that a significant portion of the work has historically been associated with coating systems PIA 107 3, PIA 151 3 and PIA 157 3. This information is provided for guidance purposes only. Tenderers are required to price all coating systems included in the Pricing Schedule as Eskom cannot guarantee future utilisation of any specific coating system
4.	25.08.2026	Refer to NEC Contract	Bidder requests confirmation of the approximate estimated m ² that are typically executed within	The extent of work depends on outage scope, inspection findings, plant condition and

			controlled radiation areas per annum	operational requirements and Suppliers should note that similar quantities cannot be guaranteed. The Employer estimates the following average volume of work for Controlled zone areas over a 60-month period, based on historical data (previous 60 months): Routine Maintenance - 1000m ² /month on 60-month average, Project work - 100m ² /month on 60 month average Outage - 600m ² /outage on 60 month average Housekeeping (Walls and floors) - 50m ² /month over a 60-month average
5.	25.08.2026	Refer to ITT	The tender documentation specifies a 90/10 evaluation criteria but does not specify what the criteria for obtaining the 10 points is, i.e. BBBEE level, Black woman owned, etc? Bidder requests confirmation	The 10 points will be allocated according to the BBBEE Level Status.
6.	25.08.2026	Refer to NEC Contract	Bidder requests clarification on the current transportation (bussing) arrangements for contractor personnel and whether it is the bidder's responsibility to transport staff from place of residence to work	The Contractor is responsible for the transportation of its personnel to and from Koeberg Nuclear Power Station. Tenderers are referred to the Pricing Data, which states that transport costs for employees are to be included within the tendered rates.
7.	25.08.2026	Refer to ITT	Bidder requests confirmation of the anticipated contract commencement date.	The anticipated commencement date for the contract would not be later than November 2026.
8.	25.08.2026	Refer to NEC Contract	Price List 4c "Special Corrosion Protection Services" refers to Corrocoat products, kindly advise how these rates are to be priced	Tenderers are required to submit their own commercial rates for the items listed under Price List 4(c) based on their

			if the specified supplier will not provide bidders quotations	experience, market knowledge, supplier engagements, historical data, and assessment of the scope and associated risks. The Employer will not prescribe rates or provide estimated pricing for these items. Tenderers remain responsible for satisfying themselves regarding the costs associated with the provision of the specialised corrosion protection services and for submitting rates they consider appropriate for the execution of the work.
9.	25.08.2026	Refer to NEC Contract	Bidder requests that the latest revision of procedure KWM-MM-COR-001 be issued.	The latest revision has been provided to the bidders
10.	25.08.2026	Refer to ITT	During the tender clarification meeting, it was indicated that bidders would be afforded twenty-one (21) days from the tender closing date to provide proof of application for CIDB Grade 6SD. Bidder requests confirmation of this arrangement.	Under South African law, the Construction Industry Development Board (CIDB) Act 38 of 2000 establishes a mandatory regulatory framework dictating that any contractor participating in public sector infrastructure delivery must have an active status on the national Register of Contractors. Any business looking to tender or execute a contract must have valid proof of registration with a CIDB grading of 6SD or higher, which must be submitted by the closing date.
11.	25.08.2026	Refer to ITT	Request for tender extension closing date	Given the urgent nature of this project, it cannot accommodate any extensions to the deadline. Your prompt attention is essential to ensuring its success.
